WOODS HOLE, Massachusetts — Ocean

explorers who found the great passenger ship Titanic last fall left here Wednesday to visit the sunken ship again. They hope this time to view the grand staircase and the ship's ornate promenade deck, for the first time since the Titanic sank early April 15, 1912, after tearing open its hull on an iceberg.

When they found the Titanic last September, the explorers, from the Woods Hole Oceanographic Institution, took some blurry blackand-white photographs from an unmanned

This time, the group plans to use a small submarine, the Alvin, to land on the Titanic's deck and launch a robotic camera they call the "swimming eyeball."

The robot, which is 28 inches (three-quarters ise that Amman would replace Bei- nf a meter) long, will be tethered to the submarine by a 200-foot (60-meter) line. It is to enter the Titanic and take detailed color tapes as it moves through the interior. .

Robert Ballard, leader of the team, said he hoped to inspect not only the promenade deck but also interior spaces where the 883-foot vessel broke apart.

"It's like a 13-story building cut in half," Mr.

tic swimmer, called Jason.

U.S. Explorers Set Out to Descend to Titanic by Sub

"If we do what we ought to do," Mr. Ballard said, the team will "create the illusion of being there" and not just get the usual underwater pictures which are "a little high, kind of fuzzy, and don't really feel like you are there."

Jason was built at Woods Hole's Deep Sub-

mergence Laboratory with U.S. Navy funds, in a project that will cost about \$3 million. The present mission is expected to last three weeks and cost \$500,000. The Oceanographic Institution's ship, Atlantis 2, is to sail Wednesday at 8 A.M. and reach a

south of the Grand Banks, on the slopes of the continental shelf, at 41.4 degrees latitude and 50.1 degrees longitude. The Titanic, which at the time of its construction was the largest man-made moving object on Earth, sank quickly and took more than 1,500 people with it. More than 800 made it into

site over the Titanic late on Saturday. It is just

lifeboats and were rescued. The Titanie now sits upright on a slight slope, with its bow section and two-thirds of the hull relatively intact. Trailing out 4,000 feet behind the wreck is a

scattering of debris, including chamber pots, silver platters and wine bottles.

The plan is to send the submarine Alvin, with Ballard said. Staterooms, passageways and oth-the robot on a bow, in the 12,500-foot depth,

er compartments may be accessible to the robo- Likely landing spots for the Alvin will be scouted in the first days of diving, said the submarine's pilot, Ralph Hollis.

He said the process of diving and resurfacing would take about five hours. By the third or fourth day, the team expects to try explore the grand staircase and promenade deck. A large glass dome over the staircase shattered when the Titanic sank, so the explor-

ers plan to send the robot through the 20-foot One of the more scientific questions to be answered by the close-up study of the Titanie is whether sea organisms devour wood in a sunken craft and, if so, how long that takes. Mr. Ballard said he is opposed to raising any artifacts, but said he might change his mind if it

became clear that the extensive wooden parts of the ship might be devoured soon. The researchers intend to leave two bronze plaques on the wreck. One, from the Titanic Historical Society, memorializes those who perished, and also commemorates the role of the society's leader, William H. Cannon 4th, who

died before the wreck was found. The other plaque, from the Explorers Club of New York, urges that "any who may come hereafter leave undisturbed this ship and her contents as a memorial to deep-water explora-

# Kaunda Meets Howe; They Differ Sharply on South Africa Sanctions

LUSAKA, Zambia — Sir Geoffrey Howe, the British foreign secretary, differed sharply Wednesday with President Kenneth Kaunda of Zambia over the effectiveness of economic sanctions as a means of ending apartheid in South Africa.

Sir Geoffrey, here on behalf of mote a dialogue between representatives of South African hlacks and the white South African government, reiterated the view beld by Britain and some others that sanctions would result in more violence

and misery.

At an EC summit meeting last month, Britain and West Germany opposed proposals by other members for comprehensive sanctions against South Africa. The EC has agreed to consider sanctions in three months if Sir Geoffrey's mis-

Mr. Kaunda said that only sanctions could bring an end to apart-heid, which he likened to the system of Nazi Germany. "We call upon Britain to lead

this war against Nazism in its new form in South Africa," Mr. Kaunda said in welcoming Sir Geoffrey, president of the European Community Council of Ministers.

Mr. Kaunda said that a failure to impose sauctions would result in a

Sir Geoffrey replied: "We don't find it possible to accept the idea will achieve what we all wish and will hring down apartheid quickly.

"I think sadly that's an illusion and that economic hardship would actually sharpen the confrontation. sanctions should follow the conse-The option of peaceful negotiation certainly won't last indefinitely hut

Black leaders in South Africa and officials of the Lusaka-hased African National Congress, the main South African guerrilla group fighting to topple the Pretoria government, have refused to meet Sir Geoffrey, saying it would be a the European Community to pro- waste of time because of Britain's continued opposition to sanctions

After his private talks with Mr. Kaunda, Sir Geoffrey continued on to Zimbabwe to confer with Prime Minister Robert Mugabe and was scheduled to go to Mozambique on Thursday.

Sir Geoffrey postponed a visit to South Africa originally planned for this week. He will visit Pretoria in a separate visit later this month.

■ Thatcher Stands Firm Prime Minister Margaret Thatcher of Britain said Wednesday that it would be "utterly repugnant" for European leaders to impose economic sanctions against South Africa, The Associated Press

reported from London. In a radio interview, she said such action could put South Afri-can blacks out of jobs and make children starve.

Mrs. Thatcher dismissed a recent poll showing that TI percent of South African blacks supported sanctions, saying those questioned could have been terrorized "to say

what they are expected to say." "They're not something abthat one last push from outside stract," she said of economie sanc-through comprehensive sanctions tions. "They're something that has a deep effect on the lives of families in South Africa, lives of families in Europe and many other people."

She said those who demand

Stopping Cuba from broadcasting. One official said the United States was prepared to have a joint statement recognizing the right of both countries to broadcast, so long as it was consistent with the rules of the International Telecombroadcasts do not drown out an-

The December 1984 immigration accord is the only significant agreement between the Reagan administration and the Castro government. ft provided for the repatriation to Cuba of about 2,700 Cuban criminals and mental patients, who came to the United States as part of the

1980 boatlift from Mariel. in return, the United States agreed to resume processing the emigration from Cuba of about 3,000 former political prisoners and to issue normal immigration visas again to as many as 20,000

Cubans a year. Mr. Castro, angered by the use of the name of José Marti, the Cuban independence hero and poet, suspended the immigration accord on May 20, 1985, within hours of Radio Marti's inaugural broadcasts. Radio Marti broadcasts news and entertainment on the regular AM band, as well as on short wave. It replaced a regular Voice of

America program for Latin America that had been on AM. The regular Voice of America programs are meant to report about develop-ments in the United States. In recent weeks, the Cubans have allowed the resumption of air

flights to Cuba by Cuban-Americans visiting relatives, as an apparent sign of a desire to ease relations Reagan administration officials said. They have also freed additional political prisoners.

■ Castro Meets Mother Teresa Mr. Castro met Tuesday with Mother Teresa of Calcutta, the winner of the 1979 Nobel Peace Prize for her work among India's poor, the Prensa Latina news agency of Cuba said, according to The Associated Press.

The Prensa Latina dispatch. monitored in Mexico City, gave no details of the talks, but said that Mother Teresa had arrived in Havana for a brief visit at the invitation of the Roman Catholic Episcopal Conference of Cuba.

# U.S. Bans Preservative In Fruits, Vegetables

By Irvin Molotsky
New York Times Service

WASHINGTON - The Food and Drug Administration has banned the use of sulfite preserva-tives in fresh vegetables and fruits in the United States.

The ban, announced Tuesday, had been expected after months of investigation and scientific testing. It is to become effective Aug. 8 and apply to retail sales in both food stores and restaurants.

It is expected to have its greatest effect in restaurants, because many have used sulfite-containing additives to keep vegetables and fruits fresh-looking. Incidents of allergic reactions to sulfites have increased with the growing popularity of sal-

Sulfites have been linked to 13 deaths and many illnesses, mainly among asthmatics. Consumer protection group leaders and some members of Congress said the ban does not go far enough and should include sulfites in prepared foods.

Mitchell Zeller, a lawyer with the Center for Science in the Public Interest, a consumer group that petitioned for a ban on sulfites in food in 1982, said: "We are happy that the FDA did what it finally did, but it falls far short of protecting people from the life-threatening hazards posed by sulfites."

Mr. Zeller said that of 500 reported severe reactions linked to sulfites, 40 percent had involved fresh vegetables and fruits. He said the other reactions were linked to sulfites in prepared potatoes sold to munications Union. The union restaurants or directly to consumseeks to ensure that one-country's ers in supermarkets, and in dried fruit, shrimp and wine.

The chemicals affected by the order are sulfur dioxide, sodium sulfite, sodium bisulfite, potassium

bisulfite, sodium metabisulfite and potassium metabisulfite. The FDA had listed these as "generally rec-

ognized as safe" food additives. In defending his order, the commissioner of food and drugs, Dr. Frank A. Young, said: "We took the action as rapidly as we could for several reasons, especially in recognizing that the major problem was in the salad bars and in fresh

fruits and vegetables." He said that potatoes had accounted for 6 percent of the sulfite complaints received by the FDA. while salad bars accounted for 28 percent. Dr. Young said that the decision had been made to go after the biggest problem first and that other foods remain under investigation,

Asked the likely action on sulfites in potatoes, he said, "We will take it out where there are substitutes; in others, we are trying to figure out the appropriate course of

The Bureau of Alcohol, Tohacco and Firearms has jurisdiction over the contents of alcoholic beverages An official of that agency said Tuesday it soon would require labeling for relatively high amounts of sulfites. In alcoholic beverages. sulfites protect color and flavor.

Richard A. Mascolo, chief of the bureau's wine and beer branch said that regulations were in the final stages of review that would require labels for beverages with more than 10 parts per million of sulfites. This would affect mainly wines, Mr. Mascolo said, noting that they generally ranged from 50 to 150 parts per million of sulfites.

He said that until labeling is required, people thought to be allergic to sulfites, particularly asthmatics, should avoid drinking wine.

Time is what you've made it.

# Chirac Reaches the Hurdles

Unpopular in Polls, He Pushes Ahead on Key Policies

By Paul Lewis

PARIS - After a hundred days in power, Prime Minister Jacques Chirac's conservative government is approaching its most important test so far in its bid to liberalize the

French economy.

Over the next few weeks, Mr. Chirac's administration faces major challenges in three areas critical for the success of its attempt to roll back France's centuries-old tradition of state intervention in business. The challenges are also critical for its own political fortunes.

First, François Mitterrand, France's Socialist president, is expected to decide by early August whether to give Mr. Chirac power to act by decree in selling dozens of state-owned companies and banks to private investors and in abolish-

ing price controls dating to 1945.
Second, Mr. Chirac's government must decide which presidents of nationalized French companies to dismiss and whom to appoint in their place to assure that the companies are run by people dedicated to privatizing them as soon as pos-

Finally, the conservative government is committed to put into effect this month the rest of its program, including a further relaxation of foreign-exchange controls and new measures to stimulate competition.

These decisions will take place against the politically ebarged background of Mr. Chirac and Mr. Mitterrand's ostensible sharing of power as they privately jockey for advantage while awaiting the next presidential elections, which must take place by the spring of 1988 at

Although this split system of government appears to be popular with French voters, it is working to Mr. Chirac's disadvantage and in Mr. Mitterrand's favor. During their first bundred days in power together, Mr. Chirae's popularity rating dropped to 49 percent from 52 percent, while Mr. Mitterrand's

rose to 61 percent from 54 percent. Polls indicate that most of Mr. Chirac's early economic policy decisions have been unpopular, with voters tending to see them as favoring the rich at the expense of the

poor.
The latest polls indicate that 72 percent of the French oppose the government's plans to abolish the vealth tax introduced by the Socialists, 58 percent are against de-controlling prices, and 62 percent oppose easing restrictions on dismissing workers, a measure just signed into law by Mr. Mitterrand.

They also indicate that supporters of denationalization hold only a

Some trol and East-West affairs. ministers feared that euphoria resulting from the collapse of oil prices would start an inflationary boom, so they deliberately played up the economy's weaker points Socialist administration. when they took office.

industry remaining uncompetitive in international markets.

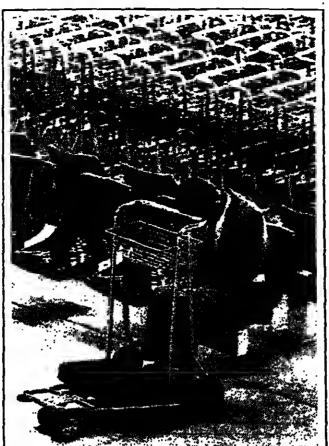

Economic growth in France is accelerating a bit and should average at least 2.5 percent this year and next. This is lower than in most other European countries but is better than the last three years of Socialist rule.

The danger of a political crisis is overhanging the whole econo-my." said a French banker who asked not to be named. "At some point, Mitterrand or Chirac may decide it's in his interest to enginee

The denationalization effort is already behind target, with the gov-ernment expecting to earn only 8 billion to 10 billion francs this year by slightly reducing its controlling interesi in insurance companies and in Elf Aquitaine, the oil giant, as allowed by existing law.

To speed up the process, Mr. Chirac forced through a law that would allow denationalization by administrative decree.

Mr. Mitterrand accepts decrees in reprivatizing the enterprises that his Socialists nationalized in 1982 if they are fairly priced and remain free from foreign control. But be wants the French Parliament to vote specifically on privatizing other companies, mostly nationalized by de Gaulle in 1945.

AIR FRANCE STRIKE — Travelers were stranded Wednesday at Charles de Gaulle airport at Roissy, near Paris, as Air France struck for 24 hours to protest the government's decision to grant routes to private airlines to French Caribbean territories and Reunion Island. Living Abroad

# Weakened Dollar No Reason a For a New Executive Exodus

By Sherry Buchanan

al Herald Tribune PARIS - After the exodus of U.S. executives from Europe in the early 1970s because of a weak dollar, many Americans on dollar salaries negotiated corporate cushions to protect them against currency fluctuations. As a result, there is no similar exodus now.

Thanks to his company's compensation package, one American based in Paris who is earning \$50,000 a year felt little pain as the dollar dropped from more than 10 francs early last year to around 7 now. "I see very little difference." he said. "The only time I feel a twinge is when I'm buying an-

Both his cost-of-living adjustment and his housing allowance have gone up with the fall of the dollar. In the last year, his cost-ofliving adjustment has gone from zero to \$467 this month. And, because of the way the company structures his housing allowance, his rent in dollars has risen 11 percent instead of by the 40-percent shift in currency values.

This is the way his allowance works: He pays 20 percent of his dollar salary, or \$833, in rent - a percentage that remains constant no matter what the exchange rate is. His apartment rents for more than \$833 but the company pays 80 percent of the differential. Thus the only part of his rent that is sensitive to a change in the value of the dollar is 20 percent of the differen-

Another manager based in Paris and paid in dollars was feeling the pinch because he gets no bousing allowance, no cost-of-living adjust-Gorbachev and toned down criticism on human rights, compared ment and no outright currency prowith comments he made in 1984 tection from his company. But be about the treatment of Andrei D. managed to negotiate a salary increase by complaining to head-quarters in New York that his stan-Sakharov, the dissident physicist. French official sources said Mr.

dard of living was suffering. Headquarters replied that he was not entitled to the extra benefits because he was a local hire, not an American sent from the United States, but gave him a 5-percent

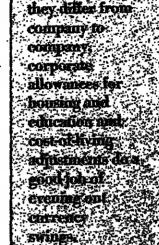

Even though they differ from company to company, corporate allowances do a good job of evening out currency swings. U.S. companies usually provide a costof-living adjustment, a housing al-lowance and an education allow-

No figures are available for the States. average housing allowance because companies vary in their policies on live. In general, the allowance is a

States; others feel their employees should live better overseas than at

For the education allowance, companies will pay on the low end for "an adequate local school" as

Even though

defined by lists issued by the State Department and the International School Services, based in Princeton, New Jersey. On the high end, some companies will pay for the equivalent of an expensive U.S. prep school, or about \$14,000 a

Treatment also can be dramatically different on the daily stuff of life, according to which cost-of-living index the company uses. The cost-of-living index calculates how many additional dollars executives need to buy the same goods and services abroad as they do at home.

Executives based in Paris who earn \$48,000 and are pegged to the Business International index, for example, are not getting any additional dollars. But the same executives pegged to the index published by Organization Resources Connselors Inc. in New York are getting \$548 a month to buy the goods and services available in the United

The B.I. index is used by 100 U.S. companies worldwide and the where an employee abroad should O.R.C. index is used by 1,000. One major difference between

percentage of salary, with the per- the two indexes is that O.R.C. ascentage lower the more the employee is paid. Some companies will pay the differential only of an apartment in a foreign city comparable Paris would continue to buy that to one in the base city in the United staple of American life, Hellmann's mayonnaise — whieb costs 27.50 francs (\$3.90) at Fauchon, the luxury calerer, compared with its \$1.90 price tag in a U.S. supermar-

Other indexes, such as Busing International's, assume that Americans abroad adapt their spending habits to the local market - buying, in Paris, a French mayonnaise for 16 francs. "As a result, our cost of living index is usually lower than O.R.C.'s," said Timothy Wolfe. product manager at Business International in Geneva.

In addition to cost-of-living, housing and education allowances. some companies offer employees abroad additional currency protection. IBM Europe, for example, less employees have a portion of their salary paid at a fixed rate of exchange. Of course this is a gamble; If the dollar drops, the employee gains; if it rises, the employee loses. Some companies that do not give allowances compensate for a de clining dollar with salary raises rather than currency protection.

"Currency protection of total income is seldom used," said Bob Coscarello, an executive at Towers, Perrin, Forster & Crosby, an international compensation consultancy in New York, "Companies believe that if they protect employees on their whole income, they would have to deduct part of the pay when

the dollar got strong again."

Besides all these benefits, a final reason that few American executives are going home is that, in comparison to the early 1970s, the dollar is still relatively high. Those who complain otherwise usually started their international assign-ment when the dollar was rising fast to its 1985 peaks.

A longer view comes from Paul Haskell, who has lived in Europe for 22 years and who heads Berndtson International in Paris, an executive-search company, "I remember when the dollar was at 3.8 French francs and then it was at 5 francs for a long time," he said. "So when it was at 10, people saw it as a windfall."

Mr. Haskell confirmed the absence of another corporate exodus. 'I am not seeing anybody leaving, he said. "I'm just finding it a lot easier to attract executives away from U.S. firms to French firms or to salaries denominated in French

# Mitterrand Wraps Up Kremlin Talks And Tours Soviet Space Flight Center

Reuters

MOSCOW - President François Mitterrand reviewed French-Soviet relations on Wednesday with Mikhail S. Gorbachev, the Soviet leader, and the two then toured

# If Sanctions Come, South Africans Look to Swaziland as 'Back Door'

Washington Past Service
MBABANE Swaziland — The big blue lettering covered one side of the export shipping container. "Manufactured in the Kingdom of Swaziland," it

"We like to identify with the country," the crisp young chief executive, Peter Jones, explained. We do everything to

avoid identifying with South Africa."
He stopped short, apparently realizing that he may have verged on an indiscre-tion since he is head of a South Africancontrolled textile mill that has just been set up in this small black Kingdom that borders white-ruled South Africa.

"Not that we are against South Africa, certainly not," he added.

In that moment, however, Mr. Jones, managing director of a \$26 million enterprise aimed at the export markets of the United States and Europe, revealed what is on the minds of a growing number of South African businessmen as the threat of economic sanctions against South Af-

They are looking for a back door ziland as a back door to evade a trade

the most promising one.

If is often heard that if sanctions were applied against South Africa because of its system of racial separation; its small black neighbors, such as Swaziland, Lesotho and Botswana, would be the hard-est hit. The South African foreign minister, R.F. Botha, has pointed out their dependence on South Africa for everything from food and jobs to gasoline and

Three-fourths of Swaziland's revenue comes from trade South Africa, and 16,000 of its people, nearly 12 percent of its officially employed labor force, have jobs there. Mr. Botha has warned that these workers might be sent home if sanctions were applied.

Swaziland's dependence on the South Africans is clear. "If they wanted to, they could literally turn out the lights," said Angela Mbuli, the permanent secretary at Swaziland's Ministry of Finance. "I doubt whether

we would last a month. But if South Africa chose to use Swa-

embargo or even a denial of landing the most promising one.

But a growing number of businessmen this it alerts the importing country implies to its national airline, this country say Swaziland could be a small ally. could prosper as Hong Kong has done by being an outlet for China

Xolile Guma, head of the economics department at the University of Swaziland, said the country "could not be as much of a back door as South Africa was for Rhodesia, but it could make a significant contribution.

He was referring to the way Rhodesia evaded sanctions applied by the United Nations for 15 years against Ian Smith's white-minority government after it de-clared unilateral independence in 1965.

It is widely said held sanctions failed in Rhodesia. Mr. Smith eventually was forced to hand over power to Robert Mugabe's black government of Zimba-bwe, but critics of his government contend that Mr. Smith would not have lasted as long as he did except for the heavy back-door trade that neighboring South Africa provided.

"South Africa has no powerful ally in

They say that when the Commonwealth meets in August to consider collective sanctions against South Africa, Swaziland, Lesotho and Botswana will plead that they should he exempted.

The plea will very likely succeed, Mr. Guma said. If so, that would place Swaziland, as politically the most conservative and economically the most suitable. in a position to prosper from a backdoor relationship with South Africa.

People in government here stress that any such relationship would have to be

There is no way we are going to allow false 'made in Swaziland' labels." said Derek von Wissell, the country's minister of trade and commerce.

Some South African exporters have tried false labeling, hoping to get around consumer boycotts of their products. Mr. von Wissell said that "Swaziland wines" have turned up in Canada, al-Antarctica," has become the retort to though Swaziland produces none. He it gets preferred treatment from Com- said, it will have to consider severing the those who say sanctions would not work. said that when the government learns of

"We have to protect our credibility, be said. "We are too small to start doing things we shouldn't he doing."

Mr. Guma holds a similar opinion, but added, "Even on the basis of legitimate business activity a lot could he done that would help South Africa, and it could mean a big boom for Swazi-

To some extent the boom has already

What the potential investors discover is that Swaziland offers not only an escape from sanctions and boycotts, but also gets preferential treatment as a member of several international organizaoons, while still having the domestic South African market on its doorstep.

As a member of the Lome Agreement, it gets the preferential treatment accorded Third World countries in the Europe-

As a member of the Commonwealth, alth countries that are not mem-

As a member of the Preferential Trade Agreement among east, central and outhern African states, it gets preferred

treatment there, too. South African businessmen have noted that under these agreements, only 25 to 30 percent of a manufactured product needs to be completed in a country to

qualify for its certificate of origin.
Thus, a South African company can set up a subsidiary in Swaziland, send it goods three-quarters finished for completion, then ship them out through South African ports without fear of boycotts. The goofs could be sold at preferential rates in some of the world's most

lucrative markets. But not everything is rosy. The steep decline in the value of South Africa's currency, the rand, to which Swaziland's angeni is linked, has doubled the cost of servicing the kingdom's \$85 million foreign debt in two years. And if the rand continues falling, the government

# 'As If Nothing Happened'

In public, Corazon Aquino and her nist insurgents. A coup with Mr. Enrile's ministers have chosen to dismiss the quix-backing would probably not have failed. otic coup attempt against them as ridiculous and unimportant. "Let us forget it as if oothing happened," Defense Minister Juan Ponce Enrile reportedly said. Warning that "the military organization must oot be fragmented," Mr. Enrile obtained the surrender of the rebel officers and soldiers by promising them, at the request of the president, that they would not be Mr. Enrile and General Ramos by wouldpunished. Their penance was 30 push-ups before they rejoined their units.

This "policy of maximum tolerance," as Manila calls it, may well have been the wisest and most effective way for the government to restore order. But, ominously, it may also have been the only way that was open to Mrs. Aquino.

The failed coup has shown that she is more than ever dependent on the armed forces and that Mr. Enrile is indispensable to the regime. Arturo Tolentino, the coup leader, failed because be was unable to obtain the backing of the army, to which be appealed in the name of former President Ferdinand Marcos. The Marcos name was not enough. Officers who had joined the coup explained that they did so only because they were told that Mr. Enrile and General Fidel Ramos, the armed forces ehief of staff, had broken with Mrs. Aquino over her attempt to negotiate a settlement with the Commu-

Mr. Enrile thus has an enormous responsibility. There is no reason to doubt his loyalty to Mrs. Aquino, even though he makes no secret of his long-term presidential ambitions. He does not really believe in negotiations with the Comminists: nor do most of his officers. New defections are possible. New appeals to be rebels in the armed forces are likely.

Politically, too, the fallout from the failed putsch is not over. The mutinous soldiers could be pardoned, but it will be hard to avoid bringing sedition charges against Mr. Tolentino, who at 75 is still popular. Any punishment meted out to him would further divide the country.

The coup's failure is a welcome demonstration that Mr. Marcos has lost much of his ability to influence events from exile. But it also shows how vulnerable Mrs. Aquino still is. Beyond dealing with the Communist insurgency, mending a desperately sick economy and trying to write a fair new constitution, her government is under opposition pressure to call local elections in the fall to replace the goveroors and mayors it has appointed. Foreign governments and investors should take the failed coup as a sign that President Aquino must be helped.

INTERNATIONAL HERALD TRIBUNE

# A Mandate for Nakasone

The Japanese elections were an undiluted triumph for Prime Minister Yasuhiro Na-kasone. Since he has led his Liberal Democratic Party to an unprecedented victory, he can hardly avoid extending his term beyond its normal expiration in October. Japan, in the months ahead, will be under an unusually capable and self-confident government. It is a great opportunity for Mr. Nakasone. Will he take it?

The time has come for Japan to reorganize its economy and recognize that to cootinne its phenomenal success it must now change direction. The Japanese need to invest more at home in the improvement of their standard of living. They need to make their economy less disproportionately de-pendent on exports to the United States.

The Japanese have recently received a few signals that, like it or oot, the old order is changing. For one thing, their economy seems to be going into a recession - which. incidentally, makes the election returns doubly remarkable. For another, the yen cootinues to rise against the U.S. dollar. At one point this week it was trading at its

highest level since World War II. are complementary. The two countries have

allowed this massive imbalance to develop knowing that it is radically unstable. If they do not move to resolve it on their own terms and in their own interest, the blind mechanisms of the market will resolve it on terms that are in nobody's interest.

How would it happen? At some unpredictable point, foreign investors would decide they no longer wanted to bold more dollars. Then the exchange rates would swing to whatever values of the dollar and the yen were necessary to force trade toward balance. That implies a yen rate much higher than at present, and a dollar rate much lower. The adjustment would be neither voluntary nor painless.

Both countries have a responsibility to anticipate that dire contingency.

Japan needs to begin redirecting its economy, not because the United States wants it but because its own prosperity is going to require it. The American market is not likely to be as accessible to Japan in the future as it has been in the past. That is what the rising exchange rate means. The elections have oow given Mr. Nakasone and his government the strength and standing to speed up Japan's responses - if they are ready to seize their chance.

- THE WASHINGTON POST.

Sunday's elections surely constitute a personal triumph for Prime Minister Yasuhiro Nakasone and a mandate for needed economic reform. But, in a society so dependent on consensus politics, it is dangerous to expect too much too soon.

Continuing rule by the Liberal Democratic Party was never in doubt; the party represents a broad coalition of centrist interests. The real question was whether the factions dominated by the prime minister and his friends would score well at the polls. They did. The elections increased their seats in the lower house of the Diet from 250 to an absolute majority of more than 300.

Japan is experiencing recession for the first time in a decade, but voters do not seem to blame the current leadership - or do not believe that others could do better. Party rules require Mr. Nakasone to step down in October after four years in office. He has made no secret of his plan to use the victory as a lever to gain another term. The betting now is that he will succeed.

Every potential LDP leader is committed to maintaining good relations with America Unlike his rivals, Mr. Nakasone has staked his prestige on specific changes to reduce trade friction within the alliance. Earlier this year a committee of experts set

up by Mr. Nakasone recommended broad reforms to open home markets and redirect investment from export industries to housing and social infrastructure.

It is worth remembering, though, that no

future in an interdependent world. - THE NEW YORK TIMES.

## Other Comment

## **Ghosts of the Japanese Past**

Any Japanese prime minister who chooses the role of international politician takes on a task of extreme delicacy. Japan's strategic importance is something he cannot ignore; neither can he place it at risk. At the same time, he must avoid resurrecting the ghosts of Japan's militaristic past -or even hinting at their resurrection. The fact that Mr. Nakasone has succeeded not only in strengthening Japan's international position but also in improving relations with such erstwhile enemies as the United States, China and latterly even the Soviet Union is a tribute to his statesmanship and good reason to applaud his re-election.

- The Times (London). The Manila Hotel Affair

We could oot fathom what motivated the former foreign minister, Arturo Tolentino,

to take part in what was supposed to be a counter government in the Manila Hotel. Although President Corazon Aquino is perhaps right in referring to Mr. Tolentino and his supporters as "those little off-bal-anced people," she should show more ur-gency in consolidating the overall situation. The restrained manner of her government reflects an accurate assessment that Mr. Tolentino does not have effective support to change the current power structure. As long as Defense Minister Juan Ponce Enrile, General Fidel V. Ramos, the armed forces chief of staff, and the army continue to support Mrs. Aquino, it is unrealistic to expect a successful coup.

This Manila Hotel coup bas the trappings of a comic opera; but perhaps Mr. Tolentino and his supporters do provide a useful role. Unintentionally, they gave a signal to Mrs. Aquino that it is high time she put her act together.

— The Jakarta Post.

# **OPINION**

# The American Trade Deficit Can't Be Solved Abroad

By Martin Feldstein and Kathleen Feldstein

W ASHINGTON — The central emphasis in the Reagan administration's trade strategy since the Tokyo summit has been to call for faster economic growth in West Germany and Japan. This is a departure from the policy of exchange rate adjustment announced last September. Without denying the dollar must decline further, the administration

and reduce the big U.S. trade deficit.
Why has this shift occurred? The administration and Federal Reserve worry that any fall in the dollar could turn into a speculative run resulting in a precipitous drop. A sharp drop would raise import costs, putting up-ward pressure on U.S. inflation.

now urges expansion of foreign de-

mand to increase American exports

Even more worrying, a very sharp drop in the dollar could significantly shrink the inflow of foreign capital, causing a substantial rise in U.S. interest rates. That indeed is the paradox confronting the Fed: Lowering the discount rate could start a run on the dollar that led to higher interest rates in the first place.

A further reason for the administration's shift may be the domestic political appeal in telling trading partners that they have to do something to improve America's trade situation. Voters prefer that rhetorie to hearing that the dollar must decline.

But whatever the reason for the administration's new line, the truth is that expanded demand in West Germany and Japan would by itself have very little effect on the American trade deficit. There is no way that expanded demand abroad can be a substitute for a further substantial decline in the dollar's value.

Real GNP growth in the rest of the world is projected at 3.5 percent a year in 1987 and 1988. Imagine that this could be increased by a third, to 4.5 percent a year. What would such

likely to go along with Treasury Secretary James Baker's pressure for additional expansionary steps. They are already expecting domestic demand to grow at more than 4 percent in 1987 and 1988. They have recently cut taxes and have another tax cut scheduled for 1988. They are already concerned about excessive monetary

high, but the government believes that the real source of the problem is excessive wages and market rigidities. not inadequate demand. In short, the administration's new emphasis on overseas expansion cannot be the basis for a successful trade

strategy. The U.S. trade deficit devel-

oped in the 1980s because the dollar

hecame overvalued, rising more than 75 percent between 1980 and early

prowth and inflationary pressures.

West German unemployment is very

1985. The decline in the dollar is since crased about two-thirds of the increase. To eliminate the trade day cit and shrink dependence on long capital, there is no real substitute in a further decline of the dollar.

There is not likely to be a bette time than now to accept the inflating ary risks of a falling dollar. And Congress minks to im plan for su-stantial reductions of the budget def cit, there is no reason for the reduci-inflow of capital to raise interest rate above their current levels. The ac ministration should return to its po-Tokyo strategy and stop fooling the public into thinking that the traddeficit can be solved abroad.

Martin Feldstein is a farmer chie man of the President's Council of Eg nomic Advisers. Kothleen Feldstein on economist. They contributed a

# Without Growth, Economic Optimists Become Fools

WASHINGTON — Great presidents are optimists. Even Lincoln, whose demeanor was sometimes morose, must have been a bit of an optimist to see his way through the darkest hours of the Civil War.

The contrast between Ronald Reagan and Jimmy Carter, among the ment of American citizens of Japastrongest and weakest of U.S. presidents, supports the thesis.

Mixing envy and contempt, George Santayana mused in 1920: American life is a powerful solvent. It seems to neutralize every intellectual element, however tough an alien goodwill, complacency, thoughtlessness and optimism."

Part of optimism is insensitivity.

casualties or spend his time visiting hospitals filled with the costs of victory. A great president like Franklin Roosevelt could not be distracted by knowledge of the shameful intern-

Mr. Reagan claims to know of no poor Americans who are hungry, when a short walk from the White House would show him otherwise. He knows that leadership does not follow from dwelling on weakness or it may be, and to fuse it in the native negativism, and he has had the good fortune to follow a president who did not understand such basic truth.

Part of optimism is realism. Know-Mr. Santayana was saying as much.

A great general cannot dwell on ably be expected at any time makes it

By John H. Makin

possible to recognize progress toward a larger goal.

Mr. Reagan's luck is well known. But there is one case where his luck has not held. Economic growth, a critical ingredient in the president's strategy of big spending without nese descent during World War II. heavy taxes, has averaged only 2 percent during the 1980s, instead of the

4 percent he counted on. At 4 percent growth, real output doubles in just over 17 years; it takes 35 years at 2 percent. The difference is almost a generation's span, an eter-nity if spending plans that require real output to double by, say, 1997 instead of 2015 have been made.

In 1986 the total pie is not as large as we expected in 1981 it would be.

eryone tries to preserve the size of a slice. In some ways the administration tion, if not the president himse seems to recognize the need to chare the rhetoric if not the policy.

The short-of-expecuations U. economy will render some more rule shocks during this summer of budge deficit battles. The 1986 fiscal yet deficit now looks as though it will to \$220 billion, nearly \$20 billion over administration forecasts. Some face bipartisan wishful thinking will het to take place in 1987 if hig budge slashes are to be avoided.

Against a backdrop of gloomy ex nomic news, political events may b reflecting a search for brighter prespecis not tied to the economy.

The surprising strength of sucpresidential Republican candidate as the Reverend Pat Robertson me be understoring the prescience of A fred North Whitehead's 1929 deck ration that "the religious vision, an its history of persistent expansion,

our one ground for optimism,"
Mr. Whitehead's view of religie as "something which stands beyon and within the passing flux of image diate things" may differ from M. Robertson's, it is not a bad descrip tion of Mr. Reagan's optimise which has persisted through the paging flux of such immediate things a

only half enough growth. Another disquieting sign is the president's apparent insistence upo surrounding himself with economic advisers who are willing to forecast rosy economy and his unwillingnes to tolerate those, such as Marti-

Feldstein, who are not. Potential appointees like Roba-Heller, just proposed by Mr. Renga for the Federal Reserve Board, for compelled to talk about high "potest . growth rates. Martha Seger, with cherry growers in Michigan an other gress-roots business groups c an economy poised to surge to 5 or percent growth if only the shackles of

tight money were removed. She is apparently unfazed by th fact that money growth is running a a rate over 12 percent. Viewed mor broadly, the tension at the Federa Reserve may well be the result of clash between seasoned policy-mak ers and new appointees who reall believed what their elevation by the president required them to say abou

the growth potential of the economy The economy may yet surge. While 2 percent growth is not exhibitating it is not disastrous either. It is no "twilight in America," as a protec nonist presidential hopeful, Demo cratic Representative Richard Gep hardt of Missouri, recently intoned But we may want to start thinking about what would be a good outcome conditional on 2 percent growth.

On the budget, this means growth but slower growth on spending or endtlements, especially Social Securi ty. On trade it means tough bilatera negotiations to open foreign markets not unilateral trade reductions. Or tax reform it means attention to the development of a stable tax code. The gap between Mr. Reagan's aspiration for the economy and its actual performance could be almost a generation's delay in realizing the economic output expected a decade from now.

So far the gap between aspiration and realization has been bridged by borrowing. The government, households and corporations have incurred debts much faster than incomes have risen during the 1980s. If that goes on too long, optimists become fools.

James Cabell's distinction between

an optimist and a pessimist, where the former proclaims we live in the best of all possible worlds while the latter fears this is true, reminds us that leadership in such a world may be difficult indeed.

The writer is director of fiscal policy studies at the American Enterprise in stitute. He contributed this comment to The Washington Post.

## IN OUR PAGES, 75 AND 50 YEARS AGO

#### 1911: The Maine's Fate NEW YORK - The American press

Bixby that the explosion on the bat-tleship Maine in February 1898 originated internally and that the idea of an explosion externally being caused by the Spaniards must be rejected. At the time of the war with Spain most persons believed that the destruction of the Maine was really responsible for the outbreak, but of late years, especially since the Maine was raised. a popular belief has developed that the destruction of the Maine was only an unfortunate incident and that the war with Spain must have taken place in any case. The raising of the battleship removes a dangerous obstruction from Havana harbor and gives America the chance of burying her crew ashore. It also destroys the war ery of the "jingoes" who shouted: "Remember the Maine."

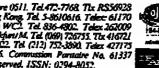

1936: Fleet Withdraws LONDON --- As a gesture of friendship to Italy and an indirect warning to Germany and Japan, the British

discusses the verdict of General government announced [on July 9] 'at that it is withdrawing the Home Flots from the Mediterranean and returning its warships to England's shores and the China Station. The government also disclosed plans for building 16 additional warships. With the bulk of Britaio's navy concentrated in the Mediterranean to the neglect of the North Sea and the thing Station Britain's influence with Germany. and Japan waned. Germany recent pied the Rhineland Japan proceeded with her penetration of North China and walked out of the London Naval Conference. Without openly conference. ing that her Mediterranean reinforce ment was a strategical error, Britain now reroutes her navy to points closer to Germany and Japan,

#### to be rid of foreign domination and achieve the last major act of Third World-style decolonizanon. Pessimists are now saying that Namibia will have to wait for majority rule in South Africa. Yet after independence in oeighboring Angola and Zimbabwe, the Namibian domino was expected to fall next. Momentum picked up as long ago as 1966, when the UN General Assembly

elected leader of Japan can turn the economy on a dime. Change requires the acquies cence of all those affected. That will be achieved slowly on subjects like housing finance, and perhaps never on highly protected, tradition-bound agriculture.

Even Mr. Nakasone's bold program fudges some of the issues that divide the allies. He apparently does not favor fis-cal expansion, which Western economists think critical to stimulating world economic growth and reducing American trade delicits. And he offers no plan for righting the imbalance in security burdens. Japan is constitutionally limited to a small defense force, but there is no good reason why it could not contribute to global security by

sharply increasing foreign economic aid. Prime Minister Nakasone's victory is a vote of confidence in the most internationally minded leader in Japan's recent history. It will take more than an election to realize his sophisticated vision of Japan's

dents, one can reflect on the past.

exhibit, where the visitor learns that the Johnson years, 1963-69, were "crowded with events — dramatic, tragic, hopeful — which related to foreign affairs." Presented for display are three of those events -Glassboro, the Six-Day War and Vietnam. A forgotten summit, an Is-raeli-Arab war and — Vietnam. Not Vietnam War," not "Vietnam Tragedy," not "Vietnam Nightmare," just Vietnam - "which for a while com-

manded the world's attention." The Vietnam exhibit tells us that President Lyndon B. Johnson was continuing policies of Presidents Dwight D. Eisenhower and John F. Kennedy to preserve the indepen-dence of South Vietnam. North Vietnamese "triggered a conflict" by attacking America in the Tonkin Gulf. 22 years ago. Mr. Johnson "chose the middle course" between a pullout and all-out war. He bombed only "military targets" and busied himself

"had given their lives." Touring the exhibit on a recent visit, I felt the ghosts of 1968 returning, and said to myself: But none of these official statements is true.

more a pretext for than a cause of U.S. bombing. Mr. Johnson hardly followed a "middle course," he unleashed more firepower than America did in World War II. He not only bombed military targets, he dropped napalm, phosphorous and anti-personnel bombs everywhere, creating millions of civilian victims and defoflating a countryside with chemicals.

president's image is involved here. The library perpetuates a polices of denial all too prevalent in America today. Many in the United States are too easily comforted by myth and nostalgia instead of truth. They are far too capable of confusing Rambo

#### By Denis Herbstein

Namibia: Only Reagan Can Cut the Gordian Knot

VIENNA — Every year without fail since its founding in 1945, the United Nations has turned its earnest attention to the question of South-West Africa. Yet the deliverance of Namibia from the colonial bonds of South Africa Britain against) to revoke Pretoria's mandate on the grounds that it had failed in its "sacred trust" over the people of Namibia. When South Africa In Vienna this week (July 7 to 11), amid the refused to pull out, the International Court of baroque splendor of the Hofburg Palace, a full-Justice ruled that the occupation was illegal. scale UN conference is considering measures to

In 1978, five Western governments - the United States, Britain, West Germany, France and Canada - persuaded the General Assembly to let them try to negotiate with South Africa. The result was the "Western Plan" (UN Resolution 435), which laid out a timetable for a ceasefire in the guerrilla war, the withdrawal of armed forces, a UN-supervised election process and,

eventually, independence for Namibia. For a few years things looked promising. Then the new Reagan administration added a cover ingredient, linking independence with the withdrawal of Cuban troops who had been invited to This linkage, accepted with enthusiasm by South Africa, was rejected by Angola, SWAPO and even France. But it altered the rules of the game. It has, more than any other factor, frustrated the

hopes of the Namibian people. SWAPO, although armed by the Soviet bloc, is by no means a Marxist movement. Namibia is Christian — not just in theory but by the yard-stick of church attendance. This is particularly true in the north, where South Africa's military presence is most keenly felt.

With Namibia in the doldrums, the South Africans launched a "transitional government of . national unity," an alliance of disparate parties,

the alliance has done oothing to upset the infra-structure which divides Namibia's education. health, agriculture and even drought relief on ethnic lines. Now there is talk of a "creeping UDI" - a unilateral declaration of independence by President P.W. Botha along the lines of Ian Smith's Rhodesian solution two decades ago. Despite the bleak picture, there are promi signs. South Africa is having to deploy more of its security forces in the black townships at home and on the borders to halt infiltration by African National Congress guerrillas. Although It has created a black territorial force of 20,000 soldiers (akin to Mr. Smith's Rhodesian African Rifles), South Africa's resources in personnel and cash are being stretched. Mr. Botha complains that the war, costing some \$1 million a day, is a drain

the largest being white nationalists of the same

ilk as the ruling party in the republic. In a year

on the economy. Namibia could also become a defensive card for Mr. Botha in the survival The Western Plan, all are agreed, is in place although South Africa has a way of stalling over details. All that remains is for the Cubans-in-Angola dimension to go away. That will not happen as long as Washington arms the National U for the Total Independence of Angola (UNITA), reinforcing Angolan reliance on the Cubans.

Linkage is Namibia's Gordian knot, and only President Reagan can cut it. Or is this handsome land of great mineral wealth and friendly people to be condemned, as Austrian Foreign Minister Peter Jankowitsch put it this week, "to the eternal politics of postponement?"

International Herald Tribune.

# One Dove's Late Lessons From the Vietnam War

By Tom Havden

brary and Museum in Austin, Texas, sits by a grassy hill where, amid a constant stream of lighthearted stu-

The library, a virtually windowless building, reminds me of a vast tomb. Inside one finds the foreign affairs

"improving the lives of people." When he retired, 35,541 Americans

The Tonkin Gulf incident was

Far more than the protection of a

SACRAMENTO, California — and Ronald Reagan. They cover their failures with platitudes about "staying the course" and sometimes still act as if real men had no regrets. But tragedies and failures can lead to knowledge, as Greek playwrights tell us, and knowledge to a different

sort of strength. Despite efforts to

rewrite history, many Americans know Vietnam was not a proud mo-ment but a modern Greek tragedy. Most men and women of my generation want to overcome our painful past divisions. After all, we have in common, first, the fact that we all were manipulated and deceived by the authorities; and second, a growing sense that those who fought and those who resisted were both moti-

vated by a sense of obligation, and that we have paid our dues. Many paid the ultimate price themselves; others tried to stop the killing. Some were stigmatized as baby-killers, others as traitors.

Very few of us could go through all that with no regrets or second thoughts. No one can feel utterly righteous about his Vietnam experience, whether he bombed a village or used a draft deferment to escape those killing fields. The strength and, one hopes, the wisdom that only comes from second thoughts can be the lasting basis of reconciliation in America, and the protection against other Vietnams happening.

I certainly have regrets of my own that I will always live with. I regret that Hanoi has an imperial design on Cambodia and has largely done away with pluralism in the south. I regret that I was not more critical of the cynical motives of the Soviet Union. regret that I was infected with a hostility that alienated me from the United States for years. I regret most of all that I compounded the pain of many Americans who lost sons and loved ones in Vietnam. I am sorry for the hurt I did while thinking I was trying to save those lives.

There is a saying that we live two lives, the life we learn with and the life we live with after that. I will always believe the Vietnam War was wrong: I will never again believe that I was always right. Nor should any of us become prisoners of that experience, as if it wimehow contained clear

ssons that are permanent guideposts in either life or politics. The upposed lessons of the past are often

the pitfalls of the future. It remains true, for example, that America cannot be the policeman of the world, but nor can it withdraw from the world and believe that all conflicts can be peacefully negotiated. It is true that a Vietnam-type war in Central America would be dishonorable and tragic, but it is also true that Third World revolutions bring their own forms of repression.

It is true that we are strengthened

by democratic debate about foreign

policy and weakened by an imperial

presidency, but it is also true that the United States needs a post-Vietnam foreign policy consensus and doves need a defense doctrine. These are among the questions facing America. The Vietnam experience cannot provide answers, but it can provide the humility needed to

hear each other in the struggle for

sane and honorable alternatives.

That humility can be found at a very different place of Vietnam remembrance than the Johnson Library, namely the Victnam Memorial in Washington. Designed by a woman of Asian descent, scorned at first but finally embraced by traditional military men, this memorial is a scarred V in the capital earth. The V becomes a black mirror in which we see ourselves reflected over and behind the names of the dead, and behind as monuments to earlier glory. There is no altempt to hide the truth

or repeat the lies, no euphemist about men "giving their lives," only the fact staring us in the face that they will have died for nothing until we, with an awful wisdom, turn their sacrifice into the triumph of peace.

The writer, a California assemblym spoke recently at a symposium on the Johnson years at Hofstra University in Hempstead, New York. This article was adapted by the Los Angeles Times.

## **OPINION**

# Soviet 'Peace Offers' Are Worth Exploring By James Reston Union. It does not persuade Mrs. Thatcher or Mr. Mitterrand that the

nvince Ronald Reagan that he should be Mikhail Gorbachev's "peace of-

wis" more seriously. They are not asking Mr. Reagan to lieve what Mr. Gorbachev says, but archy to test his sincerity in a series of S Soviet meetings at Geneva this infth, at the United Nations in Septhe U.S. congressional elections defore the end of the year.

It may not be possible to know what is the Soviet leader's mind, they argne, even to know whether his latest re-ries have the support of his colleagues he Polithuro. But, provided Mr. Reais clear about his own arms control is clear about ms own arms control
lices, what, they ask, can be wrong
at "going that last mile," as Mr.
agan has repeatedly promised to do?
that Mr. Gorbachev has changed his

e is fairly obvious. You can narmy by up a newspaper these days without long the change in his rhetoric and noccasionally some modifications of noccasionally some modifications of

the control policies.

He is still trying to divide the United the still trying to divide the United the from its allies, this time by suging that the Soviet Union is going to its old Russian tradition as a lopean nation. It is an interesting the which Mrs. Thatcher, Mr. Mited and and Chancellor Helmut Kohl of Germany think worth evolutions and and changes a strong as the second of th cow this week, Mr. Gorbachev supted Charles de Gaulle's vision, king of a Europe from the Atlantic be Urals" ridding itself "of the exive burden of armaments."

K. Kindermann's opinion column

(July 3) leaves out more than half of

tory. He makes a skewed argument

ot mentioning critical facts.

Alfuss Helped Hitler by Killing Austrian Democracy

Alfuss' fascism was not equidistant: a rigged referendum on Austria's contin-teen democracy and Nazism. He ued independence — a stupid act that gave Hitler his pretent for invasion.

"It is necessary," the Soviet leader said, "to get rid of the political thinking that views Europe as a theater of operations.' Europe must set an example of coexistence among sovereign, different but peaceful countries, countries aware of their interdependence and building their relations on trust."

Washington would like to know what this means. At face value it would mean the abolition of the Soviet Union's claim

The president's associates agree that, unlike some of his arms negotiators, he genuinely seeks an accord.

to dominate the politics of its East European allies and "trust" them to exercise

their "sovereign" rights.
Surely this is not what Mr. Gorbachev meant, but it would be interesting to ask him whether he was willing to grant the East Europeans the independence he was recommending that the West Europeans demand from the United States. Nevertheless, he also seemed to be trying to impress Mr. Mitterrand with

his concern even for human rights. The Soviet Union, he said, is prepared for "international cooperation on humanitarian problems, and these," be added, "are not mere words."
This will be news to Andrei Sakharov,

exiled in Gorky, and also to the Jews who cannot emigrate from the Soviet

democracy in Anstria left to fight for.

The writer is a professor of history at the University of California at Los Angeles.

It is completely understandable that

Germans and Austrians should wish to

defend their past against any tendency to identify all Germans and Austrians with the Nazis, Nonetheless, Professor

Kindermann's column was misleading.

man Reich in 1938 was overwhelmingly

popular, as both the plebiscite and the

crowds greeting Hitler suggested. At the end of World War I the Austrian people

had voted for an anschluss, which was

forbidden by the victorious allies. In 1938 the Christian Social regime of Kurt

von Schuschnigg felt obliged to arrange

Austria's incorporation into the Ger-

dawn of liberty has arrived behind the Iron Curtain. But they are not dismissing it as propaganda and they welcome

it as a chance for further discussion.

Even Mr. Reagan's associates agree that unlike some of his arms negotiators, the president genuinely wants an arms agreement. He is coming into his last two years with the largest federal debt in the republic's history. America is now the largest debtor nation in the world, with an alarming trade deficit.

Accordingly, Mr. Reagan is leaving a legacy on the home front that cannot be reversed or even excused in the time he has left. Thus, some of his associates are urging him to demonstrate that he

are urging him to demonstrate that he will go anywhere and talk about anything that might put an arms compromise on his historical record.

So far, however, Mr. Reagan has insisted that both his arms policies and his negotiating tactics have been right, that "fiberty" is his policy at home and abroad and that he is willing to he judged on the "rightness" of that record. In a celebration of "I Am an American" Day in Central Park on May 21, 1944, Judge Learned Hand took a different view of "the spirit of liberty." "I cannot define it," the judge said. "I can only tell you my own faith. The spirit of liberty is the spirit which is

spirit of liberty is the spirit which is not too sure that it is right; the spirit of liberty is the spirit which seeks to understand the minds of other men and

women; the spirit of liberty is the spirit which weighs their interests alongside its own without bias." The New York Times.

# Russia, Beware! Texas Has A Secret Agent Nonpareil

By Joe Murray The secret, young lady, is in the batter. Mix up some meal, black pepper

LUFKIN, Texas — I've about decided the United States is wasting money in paying to send spy satellites over Russia. Better they should just send my wife into the Moscow supermarkets. All you'd have to know is when and where the Kremlin secret-keepers do their shopping, and have her there. Before

#### MEANWHILE

you know it, they'd be wandering up to her, complete strangers, and confessing their innermost intrigues.

At least that's the way it works in

Texas. There's something about the woman that makes people want to tell her their life stories.

Last week was a good example:
"I heard the funniest story from an old man at the supermarket," she said,

setting down the groceries.
"That's nice," I said, rumaging

through the sacks to see if she had found any of that jalapeno-flavored buttermilk I'd been wanting. "But right now t'm a little busy, so if it'll wait ..."

"All about the time the preacher's wife had to sneak some beer out of his

house. But if you'd rather not ...

What it was, he had asked my wife if she liked fried green tomatoes - don't ask why, I never do - and she said she had never tried any. Whereupon he proceeded to tell her everything there was to know about fried green tomatoes, plus most everything about him.

Recently a teen-ager I had never seen

before addressed me as "Kitty." She was what we used to call "flip." She just

didn't know any better, I suggested that she use the Southern style of "Miss Kit-

ty" instead, since I am a mature lady

with naturally white hair and not her

pal. A little distance is comfortable in this sort of situation. The child backed off and after recovering from the shock

of a new idea was pleased to use what to

Doctors and ourses are particularly

offensive in addressing even an elderly female patient familiarly by first name,

or even by nickname, showing a lack of social etiquette and fine feeling.

her was a quaint way of speaking.

and gets her a can of my beer - which she'd hid the day before, what with the preacher coming to dinner — and they sneaked it into her purse. "So, that's how it came to be that I supplied beer to the preacher's wife."
He stopped to chuckle and then cootinued. "She later told my wife that after

and salt, and then you add that special

"Beer!" he exclaimed, leering. "Put

in just as much beer as it takes to make it

right. And when it's right, it's the best

there ever was. Makes oo difference

whether you're frying tomatoes, onion

rings, shrimp or whatever. You don't

have to take my word on it. My preacher

about the time the preacher and his wife

were eating dinner with them and how the preacher just couldn't get enough of the shrimp. Finally, he insisted that

"Well, naturally my wife was embar

rassed to say what it was, so she just told the preacher's wife she'd give it to her

the preacher's wife she'd give it to her later before they left.

"When they had got off together and she explained about the beer, the idea didn't seem to bother the preacher's wife

at all. As far as she was concerned, the only problem was how she was going to get ahold of any beer, especially without

her husband knowing.

"My wife, being the good Christian woman that she is, isn't one to let any-

body in need go wanting. So, she ups

That's when he got into the story

something else."
"Which is?" she asked.

would tell you the same."

his wife get the recipe.

she'd cooked up a batch of shrimp for him herself, he absolutely made her tell him what the secret was, 'cause he said he wanted to pass it along to his mother. "When she confessed, all he said was, 'Well, it sure made for good shrimp.' And that was the story my wife

brought back with the groceries. One of them, that is. "At the check-out line a young woman told me the funniest thing," she continued. "That's nice," I said, "but I really

don't have the time to ... "All about how much trouble she has finding bras, her size being 38 double Es." My wife told that story, too. Cox News Service.

#### Correction

In "The Lod: Render Never Lost Touch With Scarlett O'Hara," which appeared in this space on Tuesday, an editing error distorted the following paragraph: In the ghet-to, grubby existence also demanded grabby people. The Scarlett O'Haras among us did best for themselves. In the end, forfeiting one's soul turned out not to be a guarantee of survival. Luck was. Inevitably, though, a bit of Scarlett-like mentality rubbed off on all.

#### LETTERS TO THE EDITOR

Mussolini grew "tired of forcing Austria to be independent." He abandoned a regime that had suppressed socialists and lacked a popular mandate. Ten percent of Austrians joined the Nazi Party, of Austrian democracy. He prepared the way for Hitler by destroying democratic forces in Austrian society, weakening a higher proportion than in Germany itself. Some of the worst war criminals the country's polity so that there was oo

were of Austrian origin.
The Christian Social Party was antidemocratic and anti-Semitic. In "Mein Kampf," Hitler acknowledged his debt to its founder, Karl Lueger. It was no great moral or intellectual leap to cross

to the Nazi Party, By 1938 Hitler had achieved an economie miracle in Germany and restored its international position. Most Germans, to their shame, were prepared to ignore the negative aspects of his regime, which victimized minorities. Austrians were still badly hit by the depression, governed by an unsuccessful clique, propped up by a foreign power. Unfor-tunately, the seductions of the Huder boom were too great for most of them. Like Germans, they deluded themselves about the future course of such a ruler. After the war, because of illusions

about Austria as the "first occupied

country," as we have discovered in the

case of Kurt Waldheim, the allies took few steps to de-Nazify the country — if with almost 700,000 party members such a policy was feasible. Unlike West Germany, although oot as disgracefully as East Germany, after regaining inde-pendence Austria did virtually nothing to deal with the problem of former Nazis

bolding government office.

The ghost of Hitler is not so easily exorcised as Mr. Kindermann and the other Austrian apologists would like to think. Unfortunately, he was very much an integral part of their country's history. Hitler will only cease to haunt the Austrian past when Austrians stop beheving fairy tales about it.

MARK ALMOND. Oxford, England.

#### Last Names First, Please

Congramilations to Jill Norgren for "Let's Revert to Last Names; Familiarity Breeds Contempt" (June 28). Last names have a place in society and should be used to address strangers, casual acquaintances and even many of the peoone sees daily in the workplace. In Europe this kind of familiarity -

My compliments to Jill Norgren. A column on the matter of calling even

be a bad thing for Anglo-Saxons.

just-met strangers by their first oames, implying an intimacy that does oot exist, was long overdue. In my youth this sort of thing was considered "fresh" and very bad form.

the use of first names as a matter of

course in daily business intercourse - is

unthinkable, except perhaps in Britain. The French "Madame" and "Mon-

sieur" cover a lot of ground. Encourage-

ment of "madam" and "sir" might not

MARY WACHTEL MAUKSCH.

There was an unspoken understanding, a social rule, that older people especially were always addressed formally, using Mr., Mrs., Miss or Dr.; first names were reserved for children and servants, or close friends or relatives.

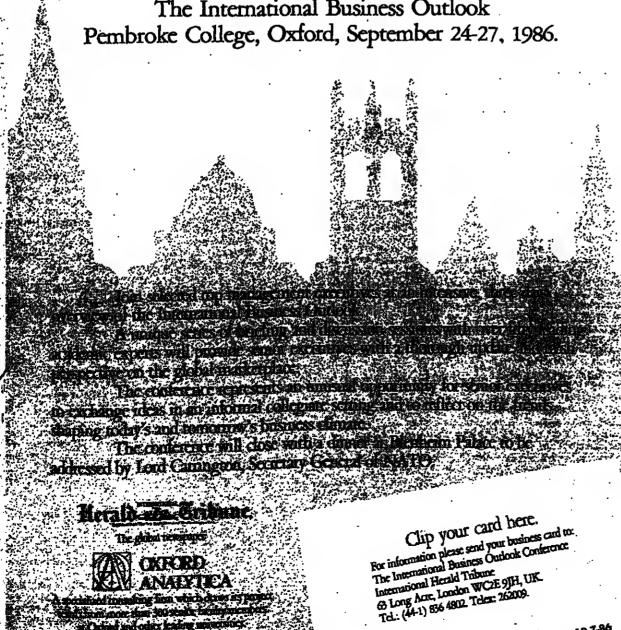

These days, social lines are blurred or obliterated and good manners are pretty much in disuse. To even speak of "social graces" is to bring on smiles. But good manners are basic. Politeness could well be taught in school, since it is apparently neglected in many American homes.

# KITTY CLOSE

I react emotionally to the use of my first name by strangers exactly as Jill Norgren does, Still, why is calling someone by his or her first name more personal than using the surname? There are far more Jills, Johns, Henrys and Marys than Norgrens, Younies, McGilly-cuddys and Featherstonehaughs. JOHN D. YOUNTE.

ode-ray tubes in the small "heads- split-second decisions.

By John Noble Wilford

New York Times Service THE pilot sits in the cockpit wearing a dark, holging, bug-faced helmet that makes him look like the sinister Darth Vader in the movie "Star Wars." Projected on his visor is a synthesized panorama of the world he is flying over and into, the terrain below and the skies around. It is like having his head inside an action-packed video

But it just may be the only way pilots will be able to handle the complex, high-speed aircraft of the future, especially in combat. Assisted by computers, tiny video tubes and other electronics, they will almost literally carry all their cockpit controls in their helmets. The engineers call this advanced technology a "virtual cockpit" or

"supercockpit."
On the helmet visor, the pilot sees moving green lines streak before his face, calling attention to anti-aircraft missile fire. He makes a sharp evasive maneuver. The panorama, 120 degrees wide and 60 degrees high, changes accordingly. The pilot swings his head left or

right and the view changes. Superimposed on one corner of the panorama are numerical readouts of his alritude, velocity and heading. There is a small square marked "status." He looks at the square, says "select" and he sees projected there for a few moments symbols indicating the plane's fuel. purpose is in know what he oeeds know when he needs to know it, and not be overwhelmed by panels

of gauges and dials. Ahead, above the outline of a distant mountain, appears a green his weapons, calling by voice com-mand for a symbolic display of the missiles available. He selects one, hy voice or by pressing a button. and the symbol for the selected missile flashes to remind the pilot it

The pilot wants a better view. "Zoom," he says, and an electronically synthesized voice echoes the command. Instantly, the computer provides a closeup image of the terrain and the bad guy. Or the pilot says "god's eye," and hears his command repeated. This, in effect, takes the pilot high above for a view of himself, the approaching enemy and the entire theater of impending battle.

With a "normal" image put back before him, the pilot points the plane so the reticle of his gunsight rests squarely over the triangle marking the location of the enemy on." Then, "fire." A symbolic exthe image. An enemy is destroyed.

A HIS was a ground simulation conducted by Technical Sergeant Vernon Wells recently at Wright-Patterson Air Force Base in Dayton. Ohio. But with nine years of experiments and tests behind them, air force officials believe the "virtual cockpit" will be incorporated in some combat aircraft by 1992, may someday enable pilots to fly their craft by remote control and could lead to civilian applications in roborics, industrial design, molecular research and home entertainment.

"We're at a point where we've proven the elements of the system." said Thomas A. Furness, chief of visual display systems at Wright-Patterson's Armstrong Aerospace Medical Research Laboratory.

Parts of the system have already been flight-tested in the United States and Britain. Sergeant Wells, supervisor of the simulator facility, said experienced pilots, after an hour's familiarization, could operate the virtual cockpit simulator with ease. A visitor, less acute and slower of reflexes, gave it a try, but took a lethal number of "hits" quicker than one could say Baroo von Richthofen.

I HE army, which is supporting some of the research, is planning to use the virtual cockpit in its LHX attack helicopter, now under development. The air force is considering the system for advanced technical fighters. The National Aeronautics and Space Administration is studying the technology. Mr. Furness estimated that the helmet and associated electronic

gear for the LHX virtual cockpit will cost \$350,000 each, while most modern military cockpits cost \$3 million. To ensure reliability, the developers said, there are duplicate channels for all systems in the virtual cockpit, but some standby controls would also be available.

Flying was simpler in World War I, when the little planes had no symbols indicating the plane's fuel. more than 10 to 15 gauges, controls oil pressure and temperatures. The and instruments. The P-51 Mustang in World War II had 35, and the F-111s in the 1960s had 200. The pilot of an F-15 today must

Radar

onto the visor.

The synthesized view of the outside world is created from digital terrain maps stored in the computer. A different set of mans can be inserted for each mission. Supplementing the maps is more up-todate information relayed by ground couroliers or fed continuously by the plane's radar and infrared detectors.

In night flight, these synthesized images would be essential. In daytime, the pilot would normally look through the transpurent visor at the real world. But in both cases, the symbolic images, control "buttons" and data on the plane's condition would be projected on the visor.

As in conventional cockpits, computers gather data on the status, location and ocientation of the craft and outside targets from seasors on the plane and communicamation is then processed not into panel displays, as usual, but into the electronic images to be flashed before the pilot's eyes.

Instruments behind the pilot generate a magnetic field within the cockpit, and a small square device at the top of the pilot's beimet, responding electromagnetically to the pilot's head movements, tells the computer where to locate the visual information within the scene projected on the visor. Likewise. the pilot can point a finger at objects in the display, virtual control "buttons," and thus actuate a com-

tions, John M. Rerstog, a manager artack planes from a safe distance of the Flight Dynamics Laborato away, in another plane or on the ry, is researching voice as well as ground, communicating by line-south controls in the virtual cock-sight radio links or by satellite. pri. Prototype systems are already

being light losted. By 1992, when the virtual cockpit is supposed to be in operation, the Darth Vader-style belows used in simulations will be replaced by a more streamlined model resembling today's headgear. The air-borne heimet would weigh less than 3.5 pounds (1.6 hilograms), compared with the six-pound test model, which can be a load on one's

EVENTUALLY. Wright-Pat-terson engineers said the system could be designed so the pilot could issue commands simply by fixing his eyes on the appropriate symbols displayed on the visor. The more advanced system could also contain brain-wave and eye-movement sensors to manitor the pilot's physiological condition and, if he is be-coming incapacitated, switch over m an "electronic co-pilot."

Even if the pilot is still in control. Furness said, such a machine would be monitoring the flow of information and what the pilot is doing and "provide decision op-

2. Simplex I has a special affinity The recent availability of an for the mouth, where it can cause cold sores and other symptoms; genital and snal area, where it can cause clusters of hlisters.

Many people are infected with both types, one in the mouth, the other in the genitals. In the genitals, simplex 1 is less likely to cause recurring symptoms than simplex 2, while in the mouth, it crupts far more often than simplex 2.

Once either virus enters the body, it invades the nervous system and takes up permanent residence in nerve roots, clusters of nerve nuclei known as ganglia, that are linked to the place of entry. Oral herpes infections establish them-selves in ganglis at the base of the brain, senital infections at the base of the spine.

Days after an infection, some people experience flu-like symp-toms and then blisters near the spot of entry. Others show no symptoms, or have lesions that are minor and resemble other problems such as hair follicle infections or "jock led to a drastic decline in vicuma

poorly equipped to cope with the infection, warned Katherine M Stone of the Centers for Disease Control. People with oral herpes, especially children, sometimes even give themselves a genital infection by touching a cold sore and ther touching their genitals.

DOME experts speculate that this practice of oral sex is contribution to the rise in genital infections with simplex 1, but no reliable informs tion is available.

Another possible reason, according to Dr. Corey, is the decline registered in oral herpes infections among the young. Antibodies formed from an oral infection with simplex 1, he said, provide a partal defense against a genital infection with the same virus. More and more teen-agers lack this protection as they begin sexual activity.

simplex 1 infection may sometimes. also help the body cope with a cups less likely, some scientists believe. Hence, the decline in onl Both viruses spread through di- simplex 1 infections among children in recent decades might also

## Vicuña Returns From Brink of Extinction

IMA, Peru - The vicuna, relentlessly hunted for its prized wool and fur, has survived the ing efforts, a resurgence in shearing threat of extinction thanks to an wool from the animal without killinternational environmental effort, ing it and efforts by several governa Peruvian ecologist says.

fia, a smaller fleet-footed cousin of the camel and Hama, once ranged throughout the Andes mountains from Ecuador to Bolivia. But demand for the animal's light-brown fur, and the practice of hunters who killed entire families for their wool rather than shear the animals live,

berds. By 1963, only 5,000 animals there were only about 5,000 vicula

were left in South America. Now, however, renewed breedments have brought the vicuns Hundreds of thousands of vica-population up in 70,000, said a Pe-

ruvian ecologist, Carlos Aldana. Last month in Lansanne, Switzerland, European delegates meeting on the sale of products from endangered species of animals and plants voted in lift a ban on the sale of soft vicuma wool, provided it is sheared from live animals.

than Homo sapiens."

in South America because their wool, coveted worldwide, brought high prices on the international hlack market. He said that an agreement signed that year by Bolivia, Chile, Ecuador and Argentine imposed severe restrictions on the sale of vicuna wool. Now, 23 years later, be said, those measures have brought tangible results.

Eighty percent of the world's population of the animals live in Peru. Most live in the Pampa Geleras National Reserve, 15,000 feet above sea level in the southeastern Mr. Aldana said in 1963 that Andean province of Ayacucho.

# IN BRIEF

#### British Breed Branchless Apple Tree EAST MALLING, England (AP) - Government researchers here

have developed a type of apple tree on which the fruit grows straight from the stem, the Agriculture Ministry says. The branchless "column trees" are on display at the Royal Show, one of Britain's top annual agricultural "The column trees do not need staking and will cost farmers about a

quarter of the present cost," the ministry said. "They can be planted at densities up in eight times greater than now used." The heavy-yielding trees are adaptable to mechanical harvesting, "need virtually no pruning and bear fruit the year after planting," it said.

The researchers crossed conventional apple trees with a Canadian apple tree, the Wijcik, which grows straight up, like a column. Commercial orchards of column trees are expected to be established in about five years, the ministry said. It said branchless pear and peach trees are also being worked on.

## Soviet Scientists See Permafrost Thaw

MOSCOW (UPI) - Soviet researchers say the temperature of the permafrost layer, which covers about half the Soviet Union and in some spots in Siberia is as deep as 1,500 meters (5,000 feet), has risen 10 to 13 degrees centigrade in the past 20,000 years because of heat rising from

Earth's core, Tass reports.

"This process is proceeding at an increasingly faster pace, thus leaving considerable areas free from ice captivity," the news agency said. The mixture of ice and earth that makes up permafrost begins to melt when anything is built on it, making road, railway and building construc-

## Birds' Bowers Called Cultural Trait

NEW YORK (NYT) - The different styles of elaborate bowers built by male bowerbirds of New Guinea and Australia to attract the attention of females may be "a culturally transmitted trait, like human art styles. and birdsong dialects," a researcher says,

Styles differ greatly among the 14 bower-building species. But Jared Diamond of the University of California at Los Angeles reports that different populations of the same species exhibit different building and decorating styles for the towers, huts or piled pathways made of sticks and decked with objects such as fruits, flowers, butterfly wings, shells and

Dr. Diamond wrote in The Proceedings of the National Academy Sciences that the Vogelkop Gardener bowerbard in Irian Jaya, Indonesia. makes "the most elaborately decorated structure built by an animal other

In an experiment, Dr. Diamond set out poker chips of seven colors near bowers. The males of one region threw the chips into the forest or let them lie, while those in the second incorporated chips into their designs. Dr. Diamond also found that young males were inept at bower-building and apparently spent years learning the style of their local group.

# Fewer Kids May Mean Brighter Kids

WASHINGTON (WP) — A psychologist theorizes that each additional child lowers the intellectual level of a family, which could help explain a 17-year decline in college entrance test scores and the recent upture in

"The intellectual environment is diluted" with each child, said Dr. Robert B. Zajone of the University of Michigan. On average, he said. first child is likely to score highest on intelligence and achievement tests, and each successive child does less well.

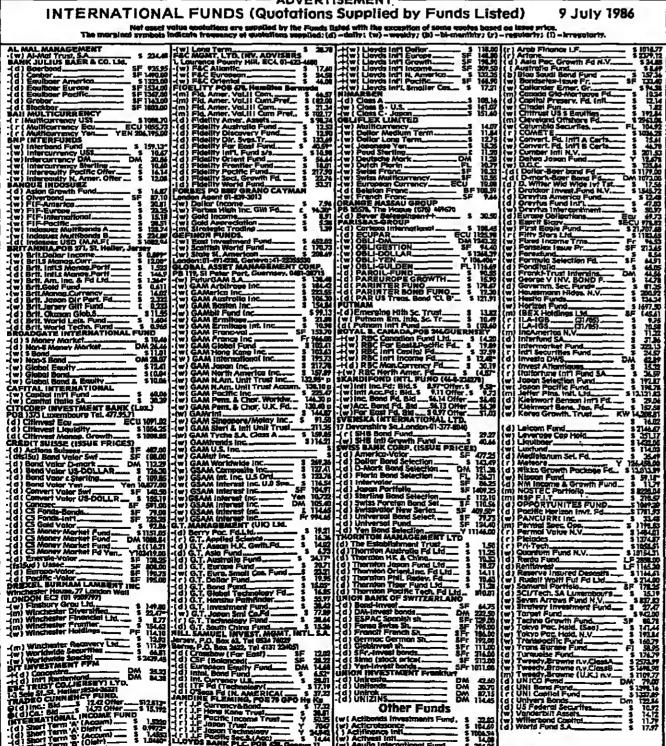

The average child taking the Scholastic Aptitude Test in 1963 was a second child, and 1980 was a third child. During that time, Dr. Zapos noted, the average SAT score dropped from 490 to 445 out of a possible 800. In 1962, the trend toward larger families reversed, and in the carty 1980s SAT scores began to creep back up. Dr. Zajone found He. predicted that the scores would continue to rise though the year 2000.

# Quasar Found Beyond 'Cutoff Point'

PASADENA, California (AP) — The most distant object yet observed in the universe, a quasar 73 billion trillion miles from Earth, might indicate that more such objects exist at the fringes of the cosmos, and force a change in scientific thinking, researchers say. "Until astronomers found the new quasar, they theorized there might

be a cutoff point at the edge of the universe, beyond which no quasard existed. This would imply that there was a precise time at which quasard and galaxies had been born," one of the object's discoverers, Wallson L.W. Sargent, said at the California Institute of Technology.

Quasars, which may be collections of black holes, appear in the sty style starlike masses but seem to generate far more energy than stars. The discovery of the new quasar was reported in the British journal Nature.

# **Dart Bids** To Buy Safeway

Offer Is Valued At \$3.6 Billion

By H.J. Maidenberg New York Times Service NEW YORK - Dart Group Corp., which operates a group of discount anto-supply and book stores, on Wednesday offered \$3.6 billion for all the shares of Safeway Stores Inc., the biggest U.S. super-

market chain. Dart, in advertisments placed in U.S. newspapers Wednesday morning, said it was offering \$58 for each of Safeway's 61.5 million

The deadline for the tender offer, which is being managed by Drexel Burnham Lambert Inc., is Aug. 5. It is contingent on the Dart's ability to secure financing.

After the annuncement, Safeway's common stock jumped \$4.625 a share, to \$58.125, in early trading on the New York Stock

Exchange.
Safeway's officers declined to discuss how they would respond to the offer. Harry D. Sunderland, Safeway's executive vice president and chief financial officer, said in a telephone interview from corporate headquarters in Oakland, California: "If an offer has indeed been made, it is unlikely that we would comment on it without seeing the terms of the offer."

The company operates nearly 2,400 supermarkets. Dart's tender offer for Safeway was not unexpected. In mid-June, Dart Group said it owned 5.9 per-cent of Safeway and might try to

buy all of the company.

The supermarket chain reacted anguly, charging in a suit that the Haft family, which owns about 25 percent of Dart, was "secretly manipulating" Safeway shares and "leaking false information" about

the Haft family's intentions to make a takeover bid. The family denied the charges, calling them "frivolous," When the snit was filed, Safeway's shares were trading at

just under \$50 a share. A market analyst who specializes Safeway shares, Ionathan cisco, said at the time that Safeway's officials would prefer a leveraged buyont by management, the purchase of a large block of stock by management or perhaps a friendlier merger partner.

# U.S. States Try Venture Capitalism They Back High-Risk Projects in Bid to Create Jobs

By James Barron New York Times Service

DETROIT — Michigan put its money in fiberglass motor homes. Ohio bankrolled a device that helps surgeons find cancer cells. And Indiana gambled on artificial diamonds, warehouselike retail stores and a publishing

house for physical funess books.

To help entrepreneurs get started, states have become venture capitalists, backing high-risk, high-profit projects they hope will create jobs and new

In the industrial Middle West state-sponsored venture capital-ism is particularly aggressive. To states that lost thousands of jobs to high labor costs and foreign competition in the recession of the early 1980s, venture capital offers a chance to shape a new industrial base.

To woo entrepreneurs, Mid-western states are copying the financing methods of venture capitalism that helped start computer companies in California and Massachusetts in the late

David Allardice, executive vice president of the Federal Reserve Bank of Chicago, says these efforts are filling a market niche the private sector was not filling" because investors doubted that new businesses could succeed in a region that used to depend on conventional financ-

"For so long," said Michael
Finn of the Michigan Venture
Capital Fund, "the Midwest was
so happy with its basic technologies, the automobile economy and everything that that support-ed, that it didn't fight for its

share of research and develop-ment in things like electronics."

Since its creation four years ago, the Michigan fund has in-vested \$48 million in 23 companies that have provided 3,162 new jnbs. Money for the fund is set aside under a 1983 law that allows up to 5 percent of Michigan's \$10.5-billion public-employee pension funds to be used as venture capital.

More than a dozen other states have similar programs. Illinois has put \$2 million into a venturecapital pool for investment in emerging businesses. The Wis-consin Community Capital Corp. has \$2.5 million in capital for small businesses and provides volunteer help from big corporations' management expertise for emerging companies.

have programs like Michigan's that invest money from state pension funds in new businesses.

Private venture capitalists are estimated to have invested \$20 billion nationwide since 1970. John Duffendack did not want

to leave Michigan to market a \$200,000 machine for research in cell biology and cancer, and \$603,110 from the Michigan fund meant the company could set up shop in Okemos, a small town near Lansing, the state cap-

Now, he said, the Michigan fund's success is making private venture capitalists look twice at proposals from companies here. Although their investments

are not limited to new businesses, venture capitalists typically provide the capital for young companies that banks reject as being too speculative. Venture capitalists invest by acquiring stock at a discount, or options to buy stock or convertible securihes at low prices.

Backing such businesses was once a sport for the very rich, and some critics of state involvement say it should still be. They argue that the needs of state officials, venture capitalists and the owners of new businesses are incompatible.

Stanley Pratt of Venture Economics, a Connecticut research company, said: "States don't un-derstand the job. If they're in

to make it a sales trip, too.

there for economic-development purposes, it's almost impossible not to measure what they do by how much money is put out instead of how many companies they start. And that's almost a Mr. Pratt also fears that politi-

cians will demand results faster than the venture capitalists can provide them. It often takes a new business five years to produce its first product, longer than most elected officials are in

State officials dealing with venture capital disagree, but admit that it is too early to tell how many businesses they are back-ing will be winners.

"The state's interest in us is the creation of jobs," said Archie Leslie, vice president of Indi-ana's Corporation for Innovation Development, "The Wholesale Club, a store we backed, created hundreds of jubs, but it's too soon to say it's a viable business. And it's too soon for this to be a political arguing point in the next election.'

In the Midwest, venture capitalism offers a chance to back industries likely to create jobs: innovative automotive suppliers, forestry, food processing and tourism, among others.

# Japan Records Widest 6-Month **Trade Surplus**

On a monthly basis, however,

The six-month surplus was and by 32.2 percent in value terms, \$17.64 billion in the corresponding period of 1985, and \$28.46 billion, the previous record, in the last half of 1985.

Imports of crude oil, which accounted for 19.2 percent of Japan's total imports, fell 30.3 percent in

Japan's first-half surplus with the United States was a record \$23.08 billion, the ministry said, widening from the \$16.77 billion in the like period of 1985. The surplus with the European Community also set a record, at \$8.31 billion. The figures from the ministry

showed the persistence of the trade of the yen, which makes Japanese products more expensive overseas and imported goods cheaper.

The rise of the yen also has a contrary effect on trade figures, however, making a comparable quantity of exports more valuable in dollar terms.

About 40 percent of Japan's export transactions are based on the yen, which closed Wednesday in Takyo at 160.10 to the dollar, 40 percent higher than last September, when five leading industrial na-tions agreed to work to depress the exchange rate of the dollar.
Officials said the June surplus

would have been bigger if Japan had nnt imported \$1.33 billion worth of gold in make coins to commemorate the 60th anniversary of Emperor Hirohito's reign. Of the total gold imports, \$1.09 billion came from the United States.

As a result, Japan's trade surplus

TOKYO — Japan's merchan-dise-trade surplus for the first six United States reached \$6.95 billion months of this year expanded to a in June, a 29.9-percent increase record \$34.17 billion, according to from June 1985, the volume of exfigures released Wednesday by the ports was down 2.3 percent over a

year ago. Officials said that Japan's ex-Japan's worldwide customs-cleared ports of vehicles had accounted for trade surplus narrowed to \$7.37 21.2 percent of total exports in the billion in June from a record \$7.53 first half. Vehicle exports rose 5.7 billion in May. The surplus for percent from a year earlier in vol-June 1985 had been \$5.02 billion. unne terms, to 3.63 million vehicles.

value, tn \$12.38 billion, as a result

of the collapse in oil prices. For the half, Japan's total exports climbed to \$98.67 billion, compared with \$92.25 billion in the 1985 period. Imports totaled \$64.5 billing, marginally down from

\$64.6 billion a year before. Exports to the United States rose 24.6 percent from the 1985 period, to a record \$37.62 billion, topping the previous record \$35.1 billion in the second half of 1985. Imports rose 8.4 percent to \$14.54 billion, up from the previous high of \$13.43 Billion in the first half of 1984.

Exports to the European Community rose 58.8 percent, in \$14.31 billion, surpassing from the previous record of \$11.01 billion in the 43.9 percent tn a record \$6 billion from the previous record \$13.43 billion in the first half of 1984.

Some EC officials have complained that Japan, in the face of pressure from Washington to reduce its trade surpluses with the United States, is simply switching its sales focus from the United States to Europe.

Japanese surplus figures are his-torically lower than those used by the U.S. Commerce Department. with the United States narrowed in \$3.85 billion in June from \$4.06 billion in May. which put the U.S. trade deficit with Japan last year at a record \$49.7 billion. (Reuters, UPI, AP)

Standard shares by Saturday.

Tan Sri Khoo, whose interests inclode hotels, real estate and banking in Southeast Asia and Australia, has been quoted as saying he is eager to build up a presence in British finance.

Last year, he acquired 25 percent of Exco International PLC, a London-hased concern involved in money brokerage and other finan-cial services. After a squabble with Exco. Tan Sri Khoo agreed not to raise his holding above 29.9 percent and was named deputy chairman.

Mr. Herke gave no prediction of revenue for 1986, but he said he take over Wheelock Marden & Co., expected slightly more than 1 mil-

# Goldman, Sachs Employee Linked to Insider Trading

New York Times Service

NEW YORK - David S. Brown, 31, a lawyer and investmen banker, has resigned from Goldman, Sachs & Co. because of links to the investigation of insider trading on Wall Street, Goldman, Sachs announced in a memorandum to employees.

Lawyers with knowledge of the widening investigation by the Securities and Exchange Commission said that Mr. Brown had been implicated and that he was expected to be charged with having passed advance information about pending takeovers to an acquaintance of Dennis B. Levine. Mr. Levine is a former investment hanker who last month pleaded guilty to charges related to insider trading. Mr. Brown is the fourth investment banker to have been implicated

Officials of Goldman, Sachs said Tuesday that they had not spoken to Mr. Brown, who was a vice president in the mortgage-backed securities department, but that his attorney had delivered the resigna-

tion on July 3.
"Neither Mr. Brown nor the SEC has informed us of the nature of the investigation, except that it is allegedly linked to the SEC's recent proceedings against individuals at other firms on insider-trading charges," the memo said. It said the company was cooperating with

Mr. Brown's attorney, David Frankel, said he would have no

The sources that Mr. Brown is the previously unnamed investme canker said to have sold information about takeovers to another Wall Street professional charged in the case, Ira B. Sokolow. The SEC charged Mr. Sokolow, formerly of Shearson Lehman Brothers, with having received \$120,000 from Mr. Levine for providing advance rips on more than 14 takeover bids. The SEC also said that Mr. Sokolow had paid emother professional for such information.

The sources said Tuesday that Mr. Brown had received about \$30,000 from Mr. Sokolow, 32, for the inside information. Mr. Sokolow settled the charges with a consent decree last week in which he agreed to turn over the money plus \$90,000 in penalties and was

permanently barred from the securities business. Like Mr. Levine and Mr. Sokolow, Mr. Brown is cooperating with the investigators, the sources said.

# Foreigners Bid for France's CGCT tronics group, have concluded an agreement is still await agreement to take over CGCT's French government approval.

By John Tagliabue New York Times Service

BONN - A tentative agreement for a French takeover of ITT Corp.'s telecommunications operations has sparked a scramble among North American and European companies for a stab at the second-largest French telephoneswitch manufacturer.

Karlheinz Kaske, chairman of Siemens AG, West Germany's largest telecommunications group, said over the weekend that Stemens was actively pursuing talks to acquire government-owned Cic. Generale de Constructions Téléphoniques.

Mr. Kaske's comments came at a news conference in Rome, the contents of which were released Tues-ley & Co. to advise it in connection day. CGCT is France's second-with the sale. Amstar Holdings was sopplier nications equipment

share of the French telephone switching market in exchange for help in selling French telecommunications equipment in the

Kohlberg, Kravis Puts Amstar Unit Up for Sale

The Associated Press NEW YORK - Amstar Holdings Inc., owned by Kohlberg, Kravis Roberts & Co. said Wednesday il intends to sell Amstar Corp.

It said it retained Morgan Stanof formed by Kohlberg Kravis when it acquired Amstar Corp. in 1984. Siemens's efforts to woo the Amstar is the largest U.S. manufac-French are significant, since Amer- turer and distributor of nutritive ican Telephone & Telegraph Co. sweeteners, and also sells industria and Philips NV, the Dutch elec-

That agreement is still awaiting

French officials disclosed this week that Industry Minister Alala Madelin would meet AT&T representatives next week, but they said that Canada's Northern Telecom Ltd. and Sweden's L.M. Eriesson also had voiced an interest in a linkup with CGCT.

Cees Steiger, an AT&T and Philins spokesman in the Netherlands said that the partners expected a decision "in the near future" and that negotiations with AT&T and ITT were "continuing parallel," implying that the French agree-ment with ITT did oot preclude an eventual accord with AT&T.

French telephone authorities reportedly are favoring the AT&T proposal and pressure on the government to reach an early decision on the ITT agreement is expected to increase the urgency of resolving the long-awaited AT&T accord.

# Isle of Man Welcomes Immigrants, But Not the Tired, Poor

By Robert O'Connor International Herald Tribune DOUGLAS, Isle of Man - As is

seeks to build a post-industrial economy, the Isle of Man has put ont a quiet call for settlers.

But huddled masses need not apply. With a population of 65,000 m in area about the size of Singapore,

he government feels there's room or about 10,000 more people. The find of pioneers it wants are what it salls the "economically active" who ilso possess the training or capital o fuel the island's growth.

# Island's Strategies to Stem Ebb of Tourism

International Herald Tribane and times a day, a steam-powered a leaves the 19th-century redrick station here bound for Port oderick, Ballasalia, Ballabeg,

cat Colby and Port Erin. : The passengers, clearly in no arry, are more interested in the iew than the final destination.

They are tourists, speaking mainly the dialects of northern Endand. And they have been coming o this island for years, seeking excipctly this kind of low-key diversion. On Monday nights, they make found at the stock-car races at tell, the announcer, directs a teady line of gentle mockery at the mateur drivers as they rumble round the quarter-mile (0.4-kilo-

acter) oval. "The speeds over the track," he announces before the heats begin, have been upwards of 25 miles an your. But not tonight. There's no O-mile-an-hour following wind." The contestants have danbed

heir vehicles with such advertising s might appeal to the special needs of the andience: "Visit Fred and \udrey at Queen's Hotel, Laxey;" . . "Cliffside Guesthouse 4 : Two nights later, this same rowd might be at the Villa Marina, he all-purpose holiday center, for the wrestling matches, where a

pical card pits Johnny Saint

gainst Bomber Billy Howes. On almost any night they might e ordering fish and chips at the arousel Cafe ("Recommended by baily Mirror Good Grub Guide.") For many British people who ave worked hard, raised their fam-les and voted Labor, this was the aly way to spend the summer holi-"Ays: a pub sing-along by night, a ated beach chair by day — and,

ways, a ramcoat handy. But times have changed. The umbers of graying heads along the afront and in the huge hotel din-'18 rooms suggest that the Isle of fan tourist is a declining, if not

adangered, species. The ferries still arrive - from i verpool, Belfast and Dublin ith young families and sand buckis. But the real spenders are far Fore likely to be in Majorca or the

anary Islands.

A decade ago, the Isle of Man veraged 500,000 summer-season isitors a year. In 1979, when it elebrated its millenium of selfovernment, it had 630,000. Since hen, according to the Isle of Man ourist Board, it has been all

ownhill, to last year's 351,000. The Isle of Man is not alone with S problems. Other traditional ntish resorts have had to contend ith the challenge from the land of

16 permanent sum.
Michael Savage, acting director
the tourist board, said: "What · t have to look at is getting people ) come to the island either in conection with a particular activity or e have to appeal to the family · hich is taking two holidays."

& Rubicam, the tourist board's advertising agency. It involves a redirection from the northwest of England and toward the more populous, and wealthier,

Nial Blatcher, a Young & Rubicam account executive in London, said that today's target is "a sort of upmarket profile of the holiday-

The strategy, he said, has been tempered by the immediate occd of Isle of Man hoteliers - in this, a local election year — to put guests in their bedrooms. So the new color advertising in glossy, quality publi-cations has been supplemented by hlack-and-white ads aimed at the traditional market.

A retired Scottish couple, walk-ing along the scafront, said they had warm memories of the Isle of Man. "We've been coming here

This is in line with a three-to- since 1932," said the husband, who

now go to Spain. And, they add, the fares to the island have gotten very steep indeed. Isle of Man TT, the motorcycle

racing event in the first week of June. This year's contest, Mr. Savand more than 9,000 motorcycles. more."

died. Critics have demanded that the race be stopped. But Mr. Savage of the tourist board argoed that "every precau-tion" is taken and that the safety

# **DGZ in 1985 Strong Resources in Wholesale Banking**

Deutsche Girozentrale - Deutsche Kommunalbank - (DGZ) is a central institution in Germany's Savings Banks Organization, the country's largest banking sector. Supported by these resources, DGZ meets the wholesale banking needs of financial institutions, corporations, and public-sector entities.

DGZ substantially strengthened its position in the wholesale banking market in 1985. Owing to significant growth in business volume, the balance sheet total was up to DM 34 billion and net profits rose to DM 29.5 million.

In the international marketplace, the Bank's full-service branch and wholly-owned subsidiary in Luxembourg both increased their Eurobusiness, with results reaching record levels in 1985. Assisted by this dual presence in Luxembourg - the most important Euromarket on the Continent - DGZ significantly expanded its volume of both Eurofinancing and syndicated international lending.

# **Amex Reports Records** In Volume and Revenue

United Press International NEW YORK - The American Stock Exchange has estimated record volume, revenues

and new listings for the first half.

The Amex said Tuesday that equity volume in the first six months was averaging 13.1 million shares a day, up 58 percent from the volume in last year's first half. Options volume was averaging 255,000 contracts daily, up 47 percent from the same period of last year. Final figures and the last this month.

are due later this month. Net income in the first half alone has surpassed the \$5 million posted for all of last year. The Amer's record of \$6.3 million in net income occurred in 1983. In 1985, the Amer listed 74 oew companies. To date this year, 45 new companies have listed.

# Singapore Exchange Approves Broker Loans

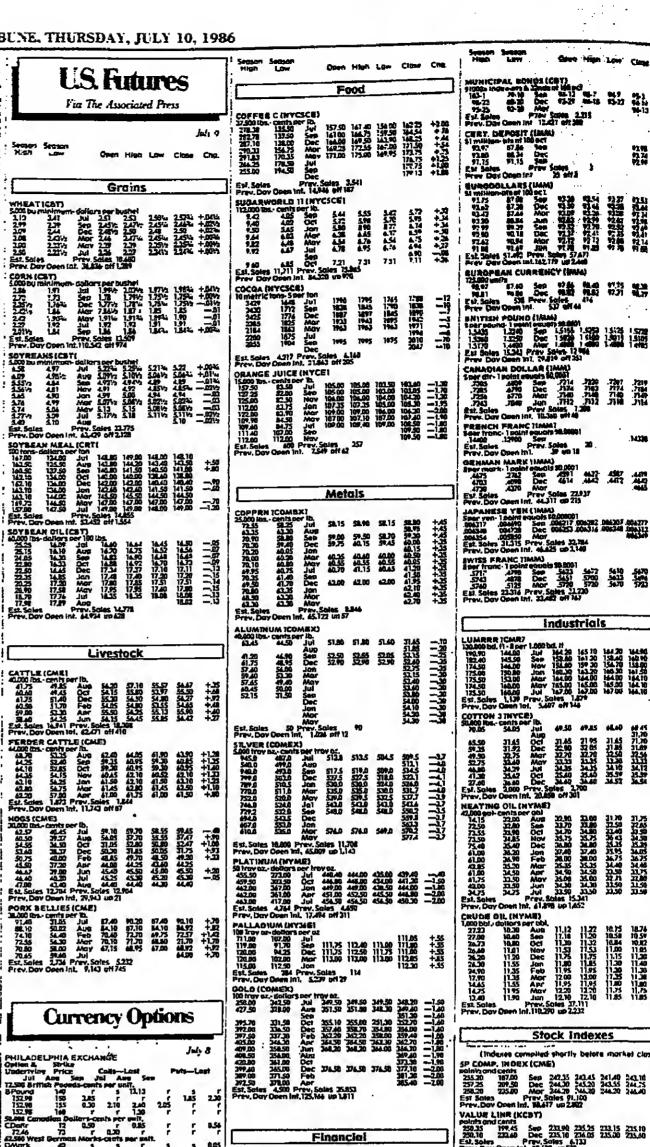

SINGAPORE — The Stock Exchange of Singapore said Wednesday that it approved applications from five stockbrokerages to borrow 51.6 million Singapore dollars (\$23.6 million) from a 180-million-dollar emergency fund formed after Pan-Electric Industries Ltd. failed.

The SES did not name the five, but brokers

said they are Ballas J. & Co., Cathay Securities
Pte., So E-Min & Co., Lin Securities Pte. and
City Securities Pte. The last two are under
provisional liquidation. The fund was formed by four major local banks in December, when problems of forward contracts surfaced after Pan-Electric was placed

in receivership owing 390 million dollars. An SES circular to brokerages said 9.34 million dollars of the fund had already been disbursed, and brokers said the money was probably withdrawn by Ballas, the first firm allowed

Others, like Mr. Seagle of Gruntal, had become concerned by speculation in video-shopping stocks and by the huge piles of new-issue prospectuses appearing on my desk." He is, incidentally, less bearish than Mr. Mendelson over the market's immediate prospects and views a range of 1,750 to 1,780 on the Dow as a possible bottom. "When you hear people widely questioning the validity of this bull market," he said in using another sentiment measure, should be near the bottom."

Robert Colby, a technical analyst at Smith Barney Harris Upham & Co., suggested the call-put ratio as another guide to sentiment. "Until Monday, more call options

# Dollar Gains on Official's Comment

LONDON - The dollar rallied on European markets Wednesday after a West German official said it had fallen far enough.

CURRENCY MARKETS

Hans Tietmeyer, state secretary for monetary affairs at the Finance Ministry in Bonn, said that a further drop in the exchange rate of the U.S. currency would be "inap-

propriate." The dollar ended firmer in London at 2.1858 Deutsche marks, compared with 2.1805 DM at Tuesday's close. It was just up against the yen, at 161.05 yen, from Tues-day's closing of 160.95.

The British pound finished lower Wednesday, at \$1.5240, after a Tuesday close of \$1.5315.

Dealers said that despite Wednesday's rise, and despite fears of Japanese and West German intervention to support the dollar, the underlying trend was toward a weakening of the currency.

This, they said, was in expecta-tion of a cut in U.S. interest rates. could have been designed to take

**London Dollar Rates** to lower their leading interest rates

in view of speculation about other rate cuts. 2.1805 1.5315 140.45 1.7753 Mr. Tietmeyer sparked speculation that the Bundesbank may join the Bank of Japan in intervening in

support of the dollar. The dollar had earlier fallen in Tokyo, to 159.90 yen at the close

from Tuesday's close of 160.95. Dealers said no short-term news But later, in Frankfurt, it jumped was expected to push the dollar out from under 2.1700 DM to 2.1780 of its current trading range be-tween 2.1650 and 2.1900 DM. On after Mr. Tietmeyer's remarks. At Wednesday, the dollar's quoted

the fixing, the dollar was set at 2.1798 DM, up from 2.1735 there on Tuesday.
In Paris, the dollar was fixed at 6.9960 French francs, up from

6.9630 on Tuesday. In Zurich, the currency closed at 1.7788 Swiss francs, up from 1.7680 on Tuesday. Dealers said the dullar still looked vulnerable on economic fundamentals. One U.S. dealer said the market still believes it can make more money by selling dollars.

(Reuters, AP, IHT)

NINE-HEADED DRAGON RIVER: Zen Journals, 1969-1985

By Peter Matthiessen. 288 pages. \$16.95. Shambhala Publications Inc., 1920 13th Street, Boulder, Colo. 80302.

MEN'S LIVES: The Surfmen and Baymen of the South Fork

By Peter Matthiessen, 339 pages. \$29.95. Random House, 201 East 50th Street, New York, N. Y. 10022.

Reviewed by Duncan Spencer

PETER MATTHIESSEN is a prodigious purveyor of expensise. Turtle fishing? Check into "Far Tortuga." Himalayan travel? There's the award-winning "The Saow Leopard." If you like white sharks, you'll love "Blue Meridian." Manhiessen is also a writer with a great deal of confidence. Who else could bring out a check the medid grants. book from opposite side of the world examin-

ing two states of art in the same year?
"Nine-Headed Dragon River" is a book about Zen, which is short for Zen Buddhism, and short, too, for zazen, which means sitting meditation, the most familiar expression of it to Westerners. Zen did not die with the 1960s. It just dropped out of sight, where it is proba-bly a good deal more comfortable. "Men's Lives" is a book about the indige-

nous fishermen of the far eastern tip of Long Island, a part of the world now dominated by the superwealthy of New York. The remaining fishermen and clammers are the area's white trash, to not quibble about it; their natural prey is the white-fleshed striped bass. Crudespoken, sometimes offensive, sometimes anti-Semitic, always disreputable (to the increasing-ly upscale inhabitants who have claimed this New England-oriented part of Long Island), the fishermen are the salt of the earth 10 Matthiessen, who fished professionally in the early 1950s. Both these books are remarkable, memora-

ble nonfiction. They are what nonfiction can be when the author lets his subject speak, and when he has gained enough knowledge to write with confidence about subjects that are not well known. Matthiessen's prose is as strong and pure as ever.
"Dragon River" is as the author warns, "a

Zen book composed against the best instincts of its author, who has no business writing upon a subject so incompletely understood - far less a subject such as Zen which is fundamen-

Solution to Previous Puzzle DECATURTLE STEROL ENA USE BUFFALOBSTER SATYR APE ZOE ERA RIP GUINEA CINCINNATIGRESS TETONS ROB SSE ADL MEL DASES WALLAWALLAMB ALI WIN MOUSSE OMEN KNOTS

tally impossible to write about." However, Matthiessen reports in the next sentence, be has practiced this intellectual's religion for 15 years; these are his journals during a pilgrimage to Japan. He was introduced to Zen through the experience of the death of his wife from cancer, in which he and she were sustamed by Zen.

Matthiessen believes, he plunges into the lore, he longs for a great experience; he meditates, learning the zazen discipline of sitting absolutely still for hours; he tries to subdue his weaknesses ("greed, anger and folly"), and for a time achieves a state of grace: "In the midmorning sittings, I become a sapling pine, warmed by the sun, swaying in the wind, inhaling wind, water, minerals, exhaling warm, fragrant amber resin. Tough roots budge subterranean rock, the trunk expands, smewy limbs gather in smlight far above, new needles shiming in new sun, new wind, until the great pine is immovable, yet flexible and live, the taproot boring ever deeper into the earth. Then the tree evaporates and there is nothing, and nothing missing, only emptiness and light."

To many, Zen will always be an amoying import. Luckily, we have the proloundly Western mind of Matthiessen emplying out his notebooks in beautiful sentences or this book. might be far more than anyone ever wanted to know about Zen.

The link and the theme that join "Nine-Headed Dragon River" to "Men's Lives" is the idea of personal discipline. The thought that work — say, the digging of flowerbeds, or the hauling of nets through the surf — is valuable in itself, and not just as a means to get something (flowers, fish), is what Matthiessen is telling about. With Zen, he is attempting to talking about. With Zen, he is attempting to learn a discipline; with the disappearing fishermen of Long Island, he is celebrating a discipline almost lost.

No one knows exactly when the first nets were laid off the windy tip of Long Island or along that vast beach that stretches from Montank to the end of the New York City snbway line at Coney Island. All that is left how is a small community of fishermen just east of East Hampton. Matthiessen is their memorialist and advocate. That part of the world has been "discovered." The glitter people have bought the dunes, hardwoods, ponds, etc., leaving little room for the fishermen who have lived there since about 1660, when the place was settled by a band from the Massachusetts Bay colony. Matthiessen is a queer hybrid, native to the place yet in any accounting a rare catch for dinner at any Hamptons summer palace

realm, and he never gets it wrong when he's talking about the ocean. He discovers a whale skull in early December: "The beautiful form, crouched like some ancient armored creature in the wash, seemed to await me. No one else was on the beach, which was clean of tracks. There was only the last cold fire of dusk, the white birds fleeing toward the darkness the frosty foam whirling around the skull, seeking to regather it into the deeps."

Matthiessen uses language in its me

In addition, he has something important; to say. The fishermen he chronicles, like the Zen monks, are men in time with pature, men who submit to its discipline, men to whom money is less important and position almost incompre-hensible. They are real, their work is real, while we, perhaps, have lost our way.

Duncan Spencer, author of "Conversation With the Enemy: The Story of Pfc Robert Garwood," wrote this review for The Washington Post.

# Bruno, British Heavyweight, Set for Witherspoon

By Francis X. Clines New York Times Service

LONDON - "It was a hook lund, the European champion. what put me down," says the large boxer, sounding more wise than fiction in the leathery blur of a angry now that he is an upright

hope for the heavyweight boxing championship, allows the candor of his one humbling defeat in 29 fights to deepen the cockney richness of

me to appreciate the good now school officials. "I was such a han-what I'm gaining through life," he 'ful, me mum sent me away," he says, bobbing the words along like says.

and paunchy lot compared to their sleek, black hero, needs no talk of

Their man has a title fight coming up July 19 at Wembley Stadium against Tim Witherspoon, the World Boxing Association heavyweight champion.

Sipping and waxing brave in the aura of their 6-foot-3, 229-pound (1.90-meter, 103.9-kilogram) hero, his supporters insist that Bruno will slide the more experienced Ameri-

So does Bruno. "This is my town,

tle," he says coldly. Out in the Essex suburbs, Withcrspoon is training more quietly.

The tabloid writers are sparring with him a bit, nicknaming him "Smoking Tim" and "the Grass Root Champ" as they play up his

trains in a gym over the pub in East

"Picture 'im, sleep w'im, shower w'im," Bruno says. "He's there all the time, but not stupidly. I know wha' I got to do to "im."

Bruno sounds serious. He now sleeps alone, apart from his beloved companion, Laura, and begins each day with a 7-mile (11.26-kilometer) run.

Then he eats one of those deathtrip British breakfasts: a steak and three eggs, a half-dozen sausages, rashers of bacon and fried toma-

commercialized fight song, its marketing timed (as is a new Bruno biography) for the bout. "Bruno Is a Man o' War," his video rock group thunders, meeting and posturing like humanoids as the crowd toasts the screen.

"Anythin' what can make your toes click, righ"?" Bruno says, aptly summarizing the video's message. "People from across the waters say I cawn't take a punch because

o' tha' defeat," he says, dwelling on the 1984 knockout hook thrown by James (Bonecrusher) Smith. "It was devastatin' bu' I was young." At night, he replays that fight along with favorite tapes of Jake LaMotta, Rocky Marciano, Joe

"Bonecrusher threw 32 punches in that 10th round; hi' me wi' four," he says. "Good punches, no ex-

CUSES. WASHINGTON — The Superstion of the Superstine of the Superstion of the Superstine of the Superstion of Georgia law making sodomy in private a crime. It is a landmark decision, and as with all landmark deci- room." sions, many citizens are very nervous. Not only are homosexuals worried by the court's ruling, but it has scared the pants off heterosexuals as well.

I know this because some of my hest friends are heterosexuals and they confide to me a lot Matingly

said, "If homosexuals are oot safe in the privacy of their

bomes, who will be next?" be next?"
"I believe you are unduly pes-simistic," I said. court would never do what it has done Buchwald

to homosexuals. Many of the justices are heterosexuals themselves." "Nevertheless, their decision is a dagger aimed at the heart of anyone who believes in a private sex life. If the state can go into the bedroom and arrest two people performing an act which has been declared illegal, what is to prevent it from going into a room next door You heterosexuals should be happy and rousting out a couple doing that what you revel io is not against something that is considered twice the law, and that you live in a

Why would the state want to do something like that?"

"Because the people who write the laws dictating what sex acts are legal and illegal would like to rule out everything but the missionary

#### **Duck Decoy Auctioned** For Record \$319,000

United Press International KENNEBUNK, Maine - A 71-

year-old duck decoy was sold at auction here for \$319,000, making it the most expensive piece of art ever sold in Maine, the auctioneer

"It really is a great American folk art," Richard W. Oliver said of carved wooden duck decoys. An unidentified man bought the pintailed drake decoy, carved around 1915 by A. E. Crowell of East Harwich. Massachusetts. The previous high price for a duck decoy was \$205,000, Oliver said.

"No, they don't. No one has ever

told me what to do in the bed-

"Then let me ask you how you feel about the pillow game."
"I don't know the pillow game."

"You beat each other with pillows until there are no feathers left in the cases. They're talking about forbidding that in Virginia."

You beterosexuals are so hysterical. The next thing you're going to tell me is that body painting your mate will be declared a crime in South Dakota.

"It will be if tickling is involved. Don't you understand that once the Supreme Court had gone through the bedroom door, there was no way of getting them out. Eight men and one woman are no substitute for one Dr. Ruth Westheimer." This is no time for panic. What

you practice in your own home, whether it be the 'Jewel in the Lotus,' the 'Gift to the Ceiling' or the Corkscrew Motion, will not be forbidden provided it meets the community standards of at least five of the nine judges. It is only homosexuals who can't practice these things behind closed doors. country where anything goes. In some societies, achieving the Great Delight of Enlightenment' with the large toe can get you 20 years in jail."

"But the Supreme Court has everyone cringing. If Georgia can pass a law against one type of lovemaking, why can't Arkansas enact one against another? Presty soon there will be no positions left."

"Even if they do pass a law," I said, "your bome is still your castle, and it would have to be very unusual circumstances that would allow the police to crash in."

"Possibly, but heterosexuals are very nervous people and just the knowledge that there may be someone on the other side of the bedroom door will inhibit us from engaging in the Yab-Yum positions."
"Why blame the Supreme Court for that?

Because when you start taking away the Yab-Yum position from one person, then yoo start taking it away from all."

# In the City of London, A Home for Risk-Takers

By Joseph Lelyveld New York Times Server

L ONDON — Pausing in a circumambu-lation of the newly opened Lloyd's Building — with tittle doubt, London's most daring postwar huilding — Richard Rogers advanced an intellectually subtle argument for its appropriateness among the classical porticoes, stone facades and Wren steeples that define its crowded ur-

ban context.

Rogers, the Italian-born English archi-tect who became known outside professional circles after he provoked notoriety and acclaim with his design for the Pompidon Center in Paris, was standing on a narrow lane called Leadenhall Place. Passionate preservationists, who are apt to regard his new building as a sacrilege, would be quick to point out that he was standing not only in the heart of the City of London, the oldest part of the modern metropolis and now its financial district,

but also at the center of the ancient settlement that the Romans called Londinium. The Roman basilica, the focus for commerce and government, stood where the Leadenhall Market stands. The market, an enclosed structure of the Victorian period adapted and gentrified for the sale of croissants, wine and charcuterie to suburhanites who work in the City, has a glazed arcade

supported by exposed iron beams. The architect was saying that the soaring 240-foot (73-meter) atrium of the Lloyd's Building with its intricately supported, glazed barrel roof, is in basic sympathy in design terms with the 1881 market oo which the new building abuts.
Rogers, 53, casually (ashionable with a

satin tie of canary yellow, footwear inspired by Keds sneakers and a baggy suit of unpressed cotton, looked exoric among the City's tailored pinstripes and bowler hats. His building shocking in the seeming newness of its concept — with its heating and air-conditioning ducts, elevators, plumbing and electrical conduits exposed on the outside - strikes some of its new denizens as exotic, too.

Someone said that Lloyd's, the insurance exchange that started in a 17th-century coffeehouse, had now moved into a coffee pot. The Evening Standard's cartoonist, Jax, showed an underwriter in full City regalia, with furled umbrella as well as bowler, being ejected like a missile from one of the exposed ducts.

Three Lloyd's underwriters, accosted at raodom, seemed to encompass the range of reactions when they were asked how they felt about their new surroundings after two

trio and the only one wearing a bowler, was the most vehement. "I think it's bloody awful," be said. The third, who appeared to be the youngest, said. "I quite like it." Yet even the man in the bowler was ready to concede that, in strictly functional terms, the architect may have given Lloyd's a structure ingeniously suited to its complex needs and the computer technology to which the City institution is having to

adapt after three centuries.

Rogers and his partner John Young, who took charge of the Lloyd's project after the design phase, do not explain the exterior of their building in strictly functional terms. Gothic cathodrals, they note, had stairways in corner towers and flying buttresses and gargoyles outside. Moreover, the break with the modernist tradition of uncluttered blocks and slabs allows for a complex play of light and shadow, making possible, as Rogers put it, "a multiplicity of readings and a richer language."

It is an understatement to say that the Lloyd's Building does not disclose itself at ooce. It has to be walked around. It is different from every approach and vantage point. The eye, which has to sort out its various components, may fasten on the glass elevators, or the stacked stainlesssteel cylinders in the service towers that cootain the toilets and stairways, or -also outside the main structure - the stacked cabins that contain paneled conference

Having all the services on the outside eased construction on an irregular site sur-rounded by narrow streets and lanes dating from the medieval period. Major structural elements could be made elsewhere and set in place outside business hours. The design should also make it easy, the architect said, to update and adapt the technology and services on which the building depends without having to tear apart the basic

Adaptability was important to Lloyd's, which outgrew three buildings in less than six decades, but undoubtedly the main advantage of putting the services outside is that the inside is left remarkably free and open. The biggest surprise in the way the building discloses itself occurs when the fortunate visitor with a pass - casual visits by curious Londoners and tourists have yet to be permitted - makes it past the tophatted doorman, who wears a scarlet coat with gold braid.

The market floor, where bids are made on policies much as they were in the coffeehouse oo Tower Street where Lloyd's was born, is a space visually unimpeded by columns and elevator shafts. Above it are

View of the floor and galleries at the new Lloyd's Building.

open galleries, used by underwriters, that was not surprising that a conservative instiare reached by escalators. Viewed from above, with light streaming down through the glass roof, it is a busy, exciting scene.

The openness is necessary for the conduct of business; it also makes economic sense, for the floor of the exchange, where souce is rented to underwriters at steep rates, is as big as it could be on the site. In terms of materials used and attention to detail, the Lloyd's Building represents high luxury when compared with the Pompidou Center, a palace of culture for the masses that Rogers said was completed for the price of a medium-sized office building.

When all the bills are in, the price for Lloyd's is expected to be around \$245 "We" million. When they were asked whether it day."

tution could invest heavily in a seemingly radical design, the architects denied that Lloyd's was conservative. By their nature, they said, underwriters are gamblers and risk-takers. "They'll sell you a \$110-million policy on a space shuttle," one of Roger's associates remarked.

The building was Rogers's first major commission in Britain, and he said he was lucky to get it. The conservation movement is even stronger today than it was in 1979, when Lloyd's won permission to take down an undistinguished and unexciting 1928 building to make room for the one Rogers

was designing.

There has been a swing back," he said. "We'd never get planning permission to-

## **PEOPLE**

Nureyev, Baryshnikov Get Their Acts Together

Mikhail Barrshnikov, 38, and Rudolf Nureyev, 48, danced to 1 gether for the first time in almost a decade Tuesday night before a co-lebrity-studded audience at the biggest cultural bash of New York's summer season. The gala also had performances by American Ballet Theater, headed by Baryshnikov, who became a U.S. citizen last week, and the Paris Opera Ballet, headed by Nureyev, With top-price tickets at \$1,000, it was a benefit for the two dance companies and the Metropolitan Opera, where it was held. Nancy Reagan was in a center box. Baryshnikov and Nure-yev, wearing tails, danced with Les-lie Caron, to music from her mov-si ies. First, she danced with six men. then with Baryshnikov and Nure-yev. Another highlight was the pas de deax from "Le Corsaire" with Sylvie Gullem and Patrick Dupond from Paris.

The Swedish soprano Birgit Nilsson, 68, one of the greatest Wagnerian interpreters in the 20th century, said in Stockholm that she is retiring from public singing. "I think the time has come to confinemy voice to the bath," Nilsson said. Her performances had become rare in recent years and she sang her last full opera three years ago.

The British pop singer Mariya appeared in court oo heroio charges Wednesday while his frieod and fellow singer Boy George, also caught up in a drug scandal, was reported to be under medical care. Marilyn, 23, whose real name is Peter Robinson, was freed mid-out to be and mid-out to be supported to be under medical care. freed without bail pending a hearing on a charge of possessing her-oin. Four others, including Boy George's brother Kevin O'Dowd, were ordered held for a week on charges of conspiring to supply Boy George with the drug. Boy George (George O'Dowd) is under round-the-clock medical supervision, said his recording company, Virgin Records, and police said they would postpone questioning

The Oscar-winning director Join Huston has been released from Cedars-Sinai Medical Center in Los Angeles after five days of reatment for emphysema. Huston, 79, will be recuperating at home, the publicist Irene Hamen said.
